Dial Out a Participant via VSee Clinic

Jay-Ileen (Ai) - 2023-08-11 - [VSee Clinic for Providers](#)

During an ongoing call, you can dial out a participant by keying in the contact's local number or key in a PIN to add an interpreter or another participant.

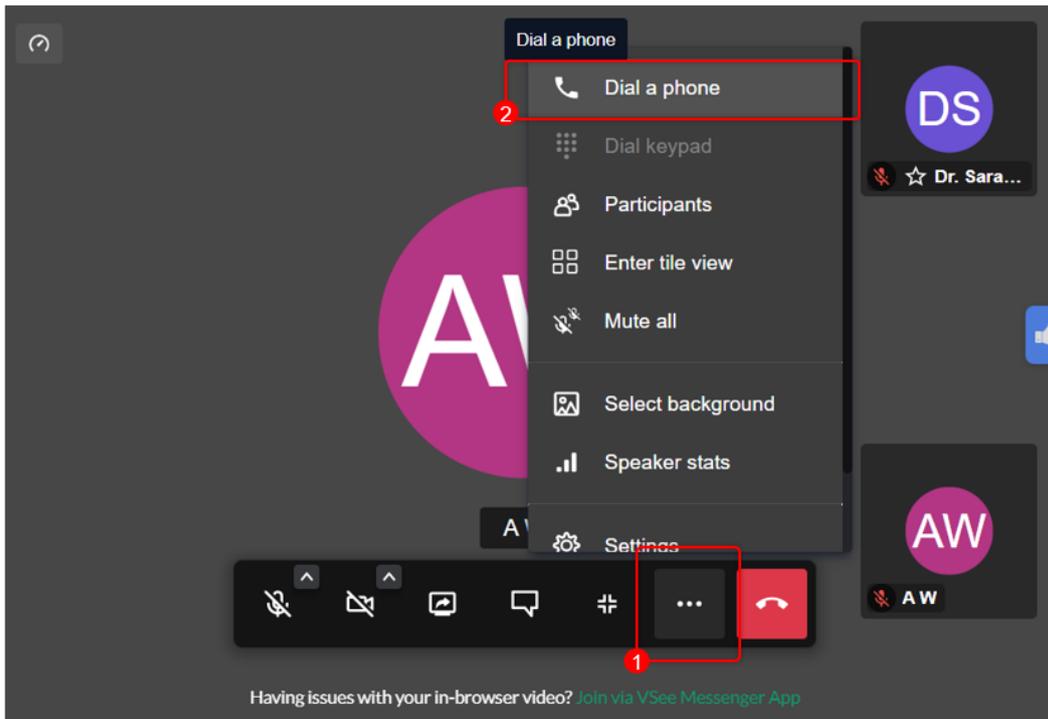

- Only moderators/[hosts](#) of the call may dial out a participant
- The Dial Keypad will be grayed out at first, and will only get activated once you have initiated a dial-out.

How to Dial Out Using VSee Clinic

1. Once in the call, click on the **ellipsis (...)** to show the menu.

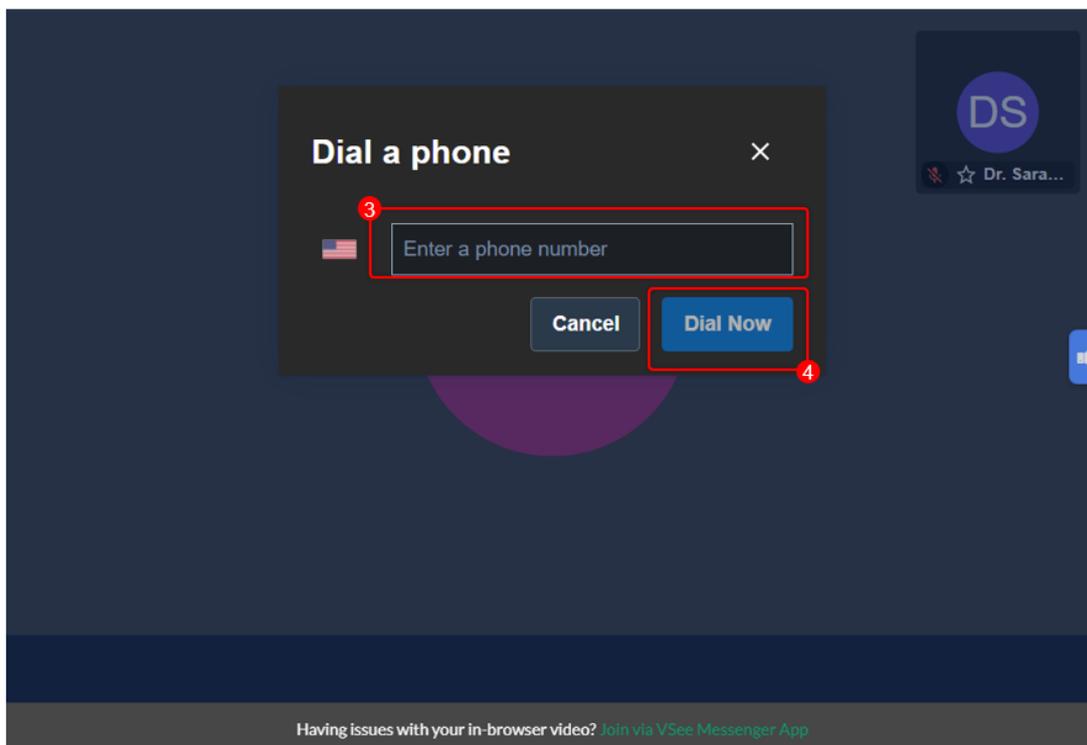

Note: The Dial-out PIN keypad is grayed out at this point. A Dial-out call must first be made before it gets activated.

2. Click on **Dial a phone**.

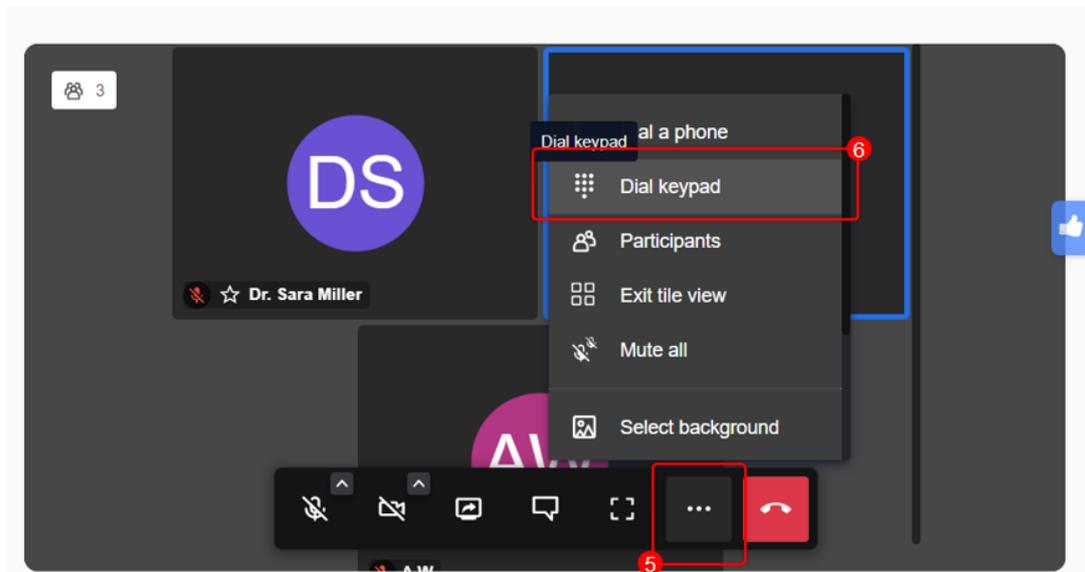

3. A pop-up window will appear. Enter a 10-digit US phone number.

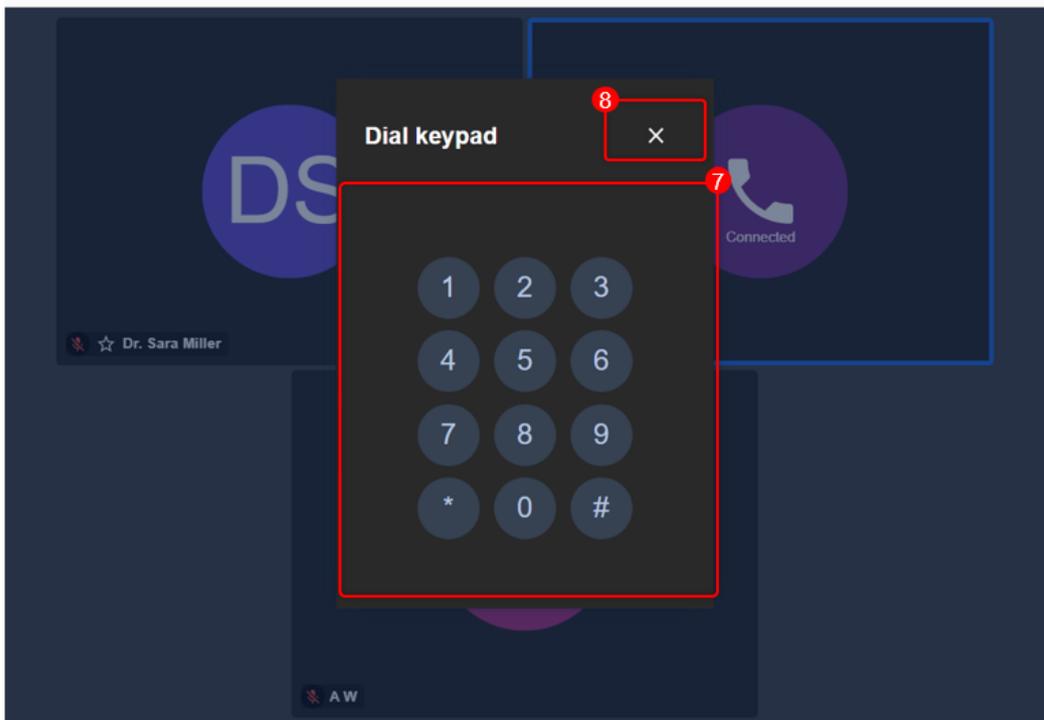

4. Click on **Dial Now** button or hit Enter on your keyboard.

5. Click again on the **ellipsis (...)** on the menu tray.
6. Select **Dial keypad** as it is now clickable.

7. The dial keypad window will pop up and you can now select the number following the recorded instructions.
8. Once connected with the dial-out participant, click on **X** to close the dial keypad window and go back to the video call view.
