### Windows Installation

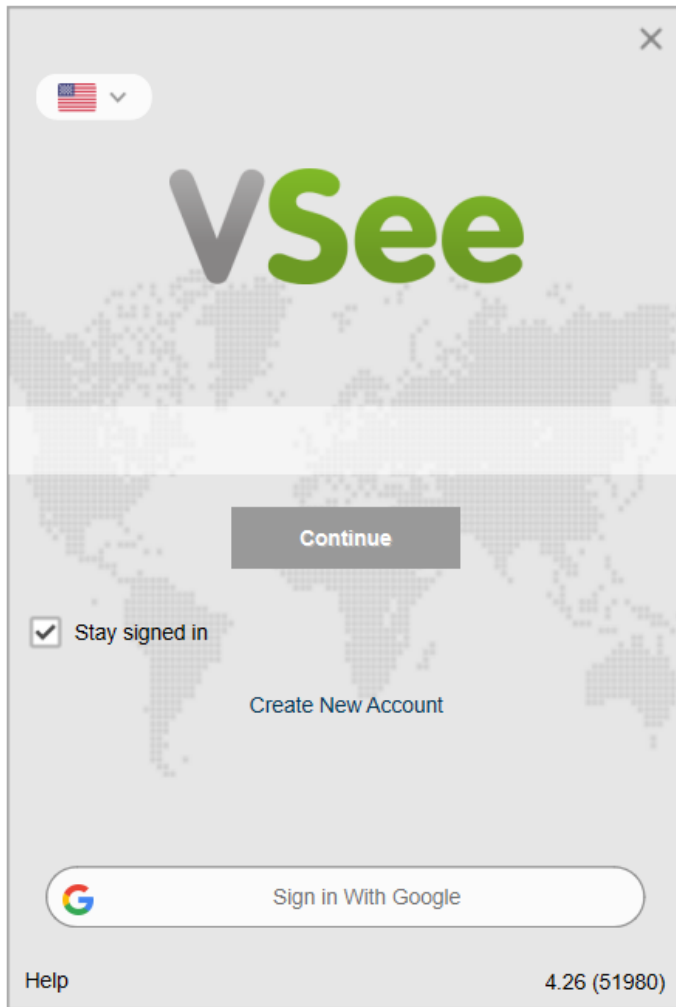

1. Open a browser and go to [VSee Download](#). The download should start automatically and will be saved on your downloads folder by default

2. Click on the **downloaded file**.

*Note: If you don't see the downloaded file at the bottom of your browser, you may go to your downloads folder or enter **Ctrl + J** which will open your browser's download manager.*

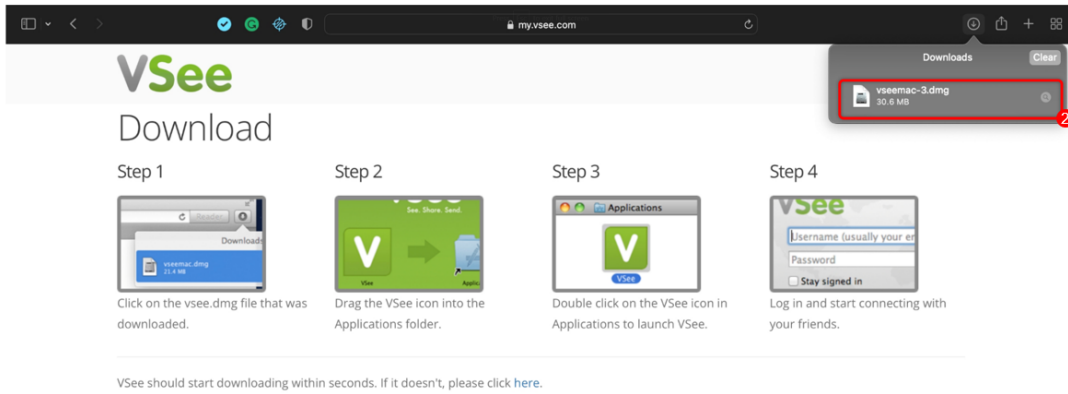

After clicking on the file, the installation should run by itself and show you the login page when done. Please note that depending on your computer's settings you may get a pop-up or a window asking your permission to proceed with the installation.

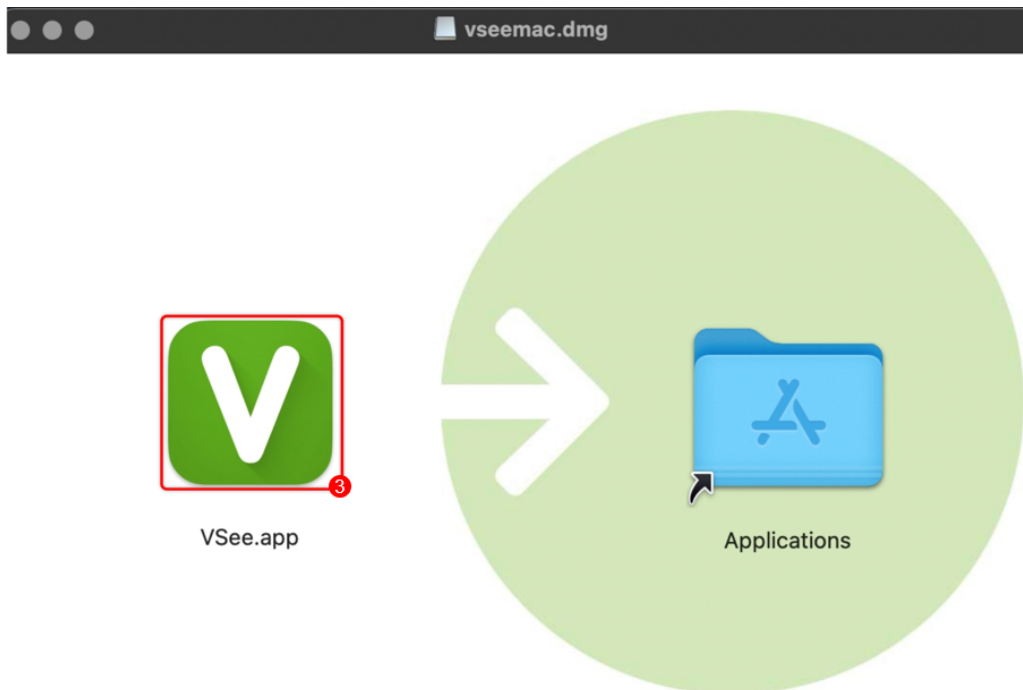

Upon logging in with your VSee Messenger account, you will be asked to test your camera and microphone. This is to ensure that the correct device is selected for the app to access.

### **Mac Installation**

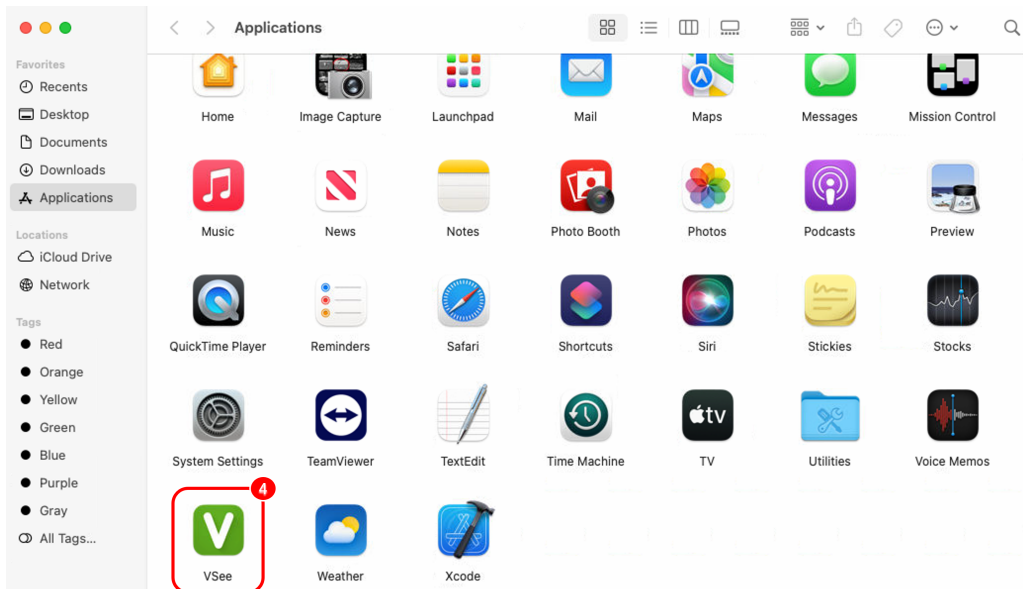

1. Open a browser and go to [VSee Download](#). The download should start automatically and will be saved on your downloads folder by default
2. Double-click on the **downloaded file**  
*Note: If you don't see the downloaded file at the bottom of your browser, you may go to your downloads folder or enter **Ctrl + J** which will open your browser's download manager.*

3. Drag (click and hold to drag) the **VSee icon** into the **Applications folder**.

4. Double-click on the VSee icon in the Applications folder to launch VSee.

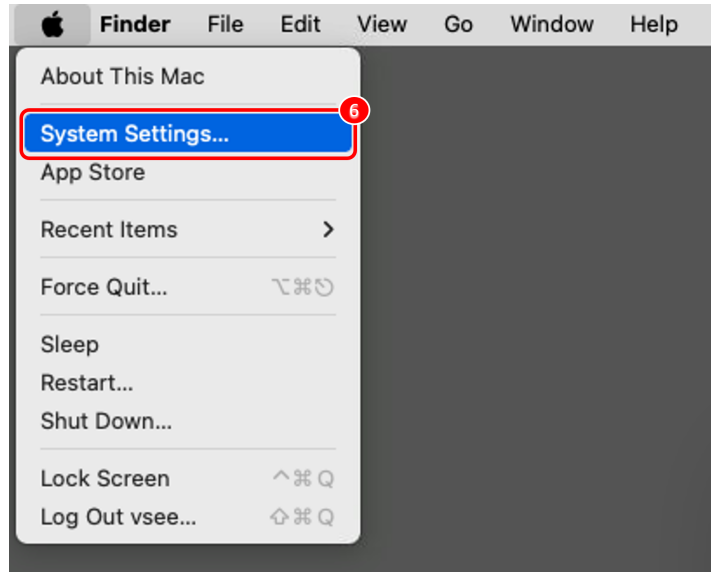

5. Click **Open**.

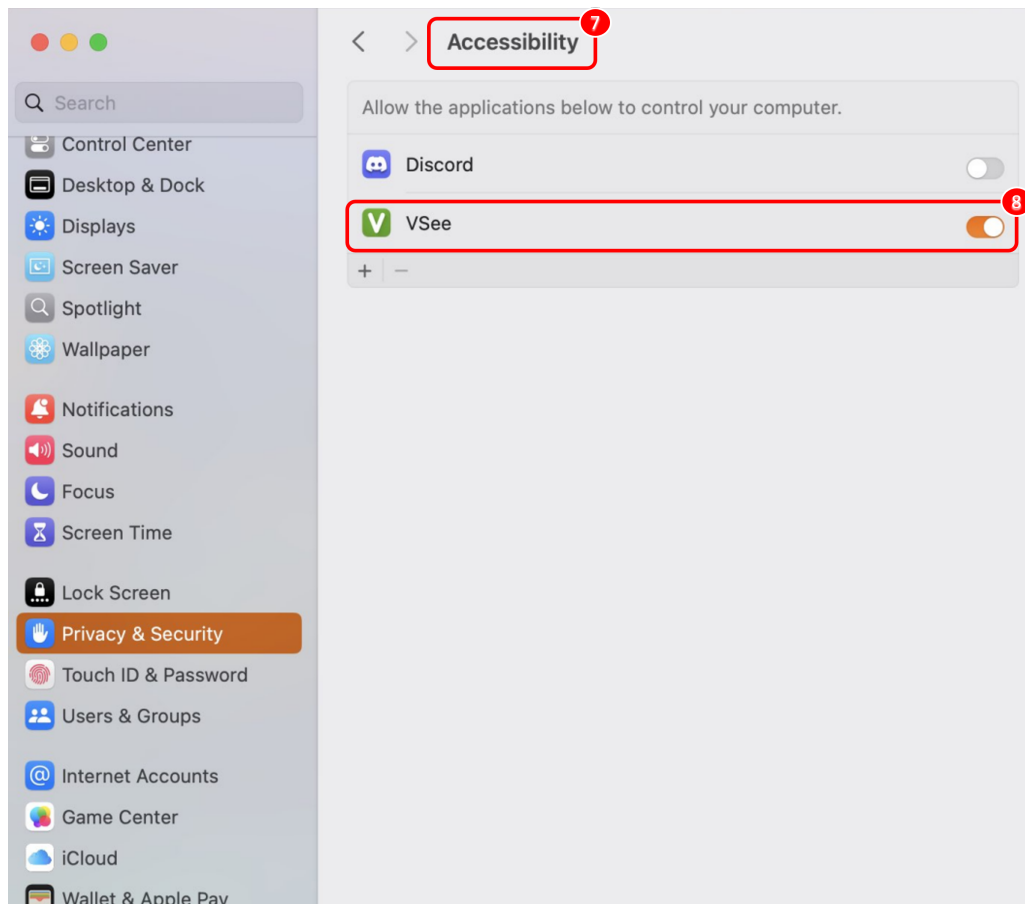

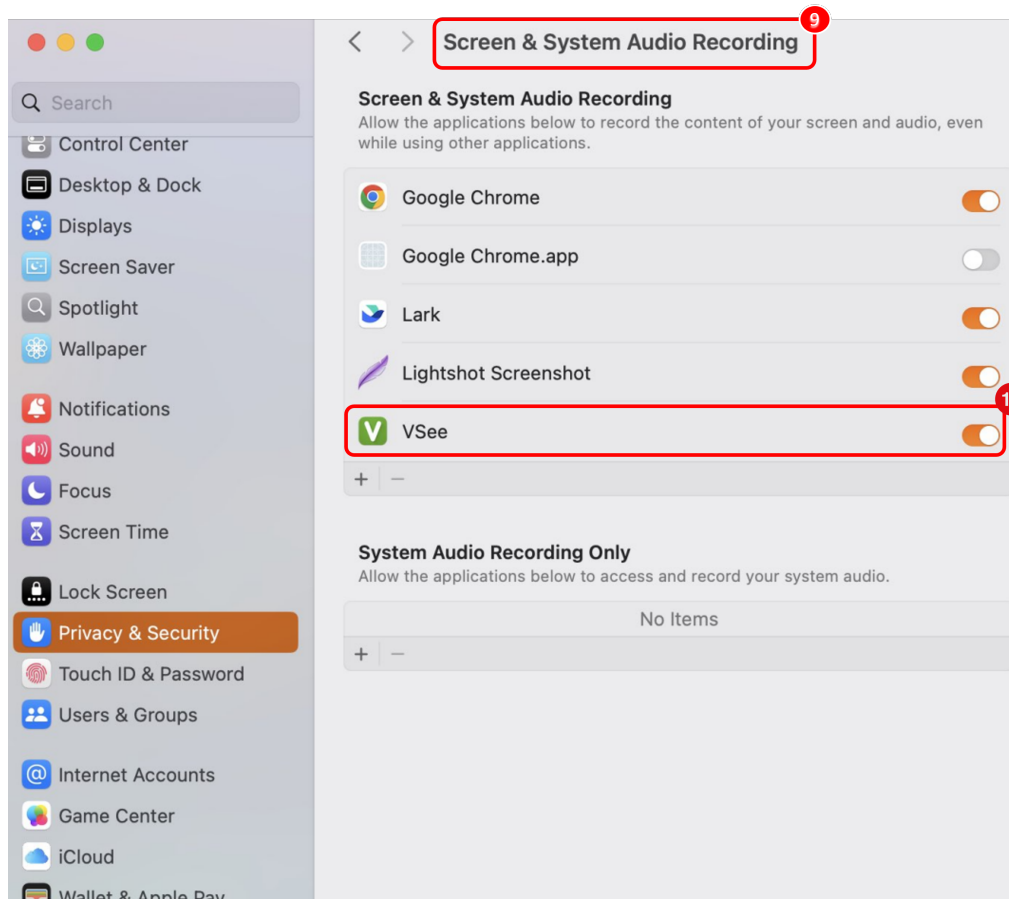

*Note: Please ensure that VSee is enabled under System Settings*

6. Go to the **Apple menu** on the top left-hand corner > Choose **System Settings**, then click **Privacy & Security** in the sidebar.

7. Click **Accessibility** and toggle **ON** the **VSee** app. Do the same for **Screen Recording** and **System Audio Recording**.

*Note: Depending on your Mac's settings, System Settings may be locked. To make changes for VSee Messenger, click the lock icon, then authenticate using your Mac password, Touch ID, or Apple Watch.*

## **Unable to Download or Install App**

For some users that are on computers provided by their office or workplace, they could be managed by your IT team and may limit your option to

download and install new apps. If this is the case, you will need to coordinate this with your IT team to get their permission or have them do the installation instead.
