Flip your Video Image (Mirroring)

- 2024-09-16 - VSee Messenger (Providers and Patients)

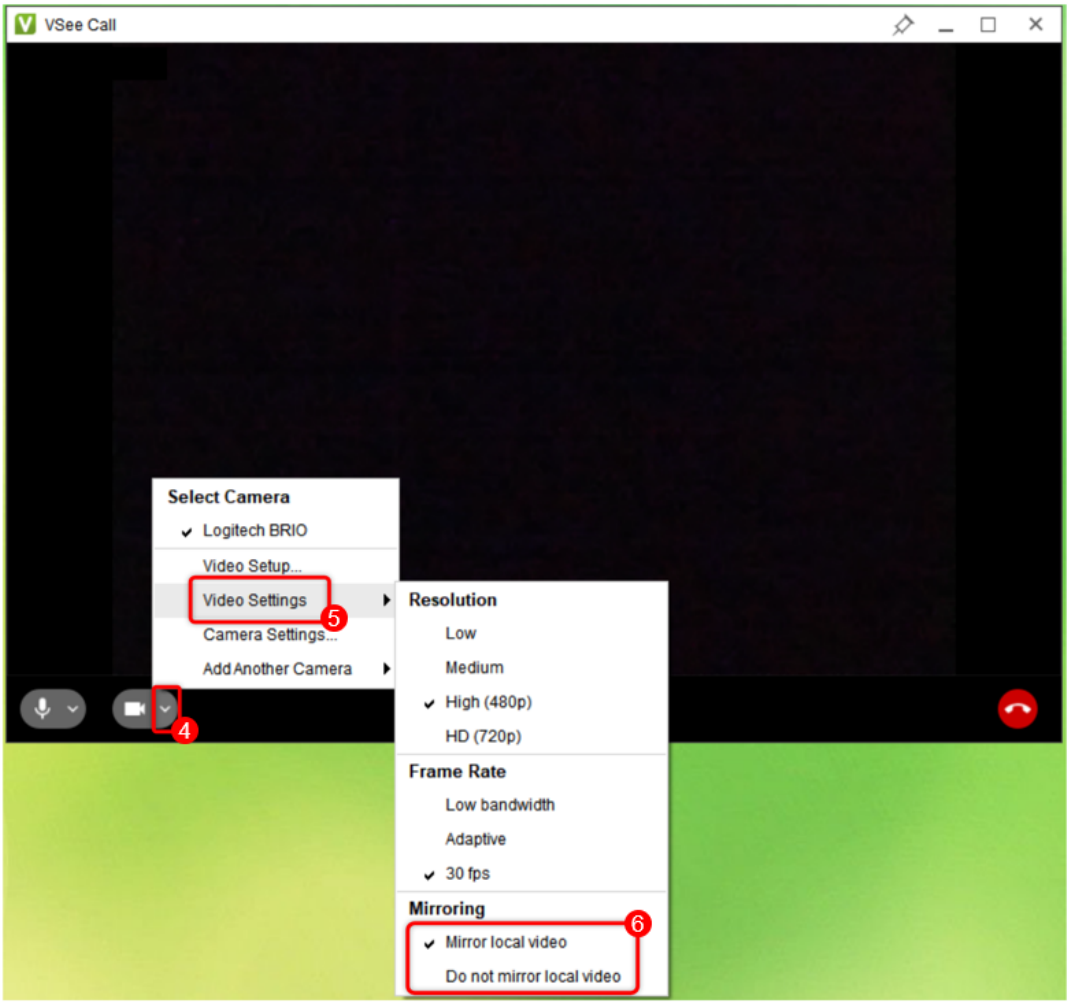

Flipping your video is helpful when hand-signing or showing documents. With VSee, you can change the mirror setting of your video during a call. To change this setting, follow the steps below:

1. Open and Log In to VSee Messenger
2. Click on your **Initials.**
3. Select **Open my video.**

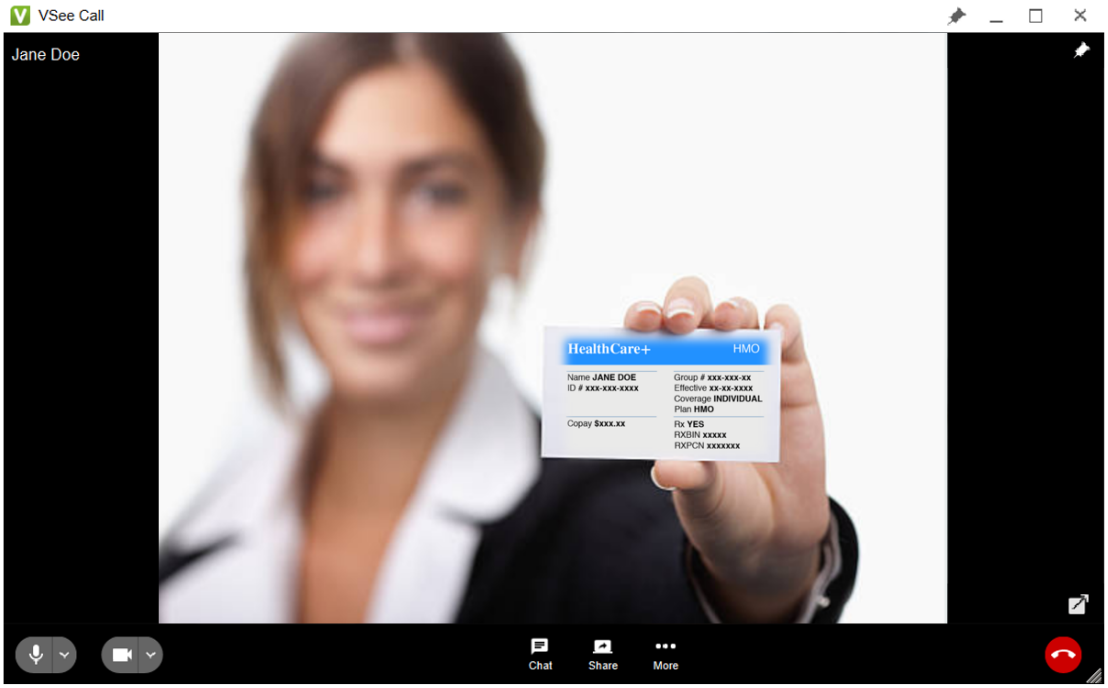

The video call window will then open.

4. Click on the **Arrow down** button beside the camera button.
5. Hover to **Video Settings.**
6. Put a check on your preferred **mirroring option.**

Note: You may also do this during an ongoing call.

Mirror local video - Select when showing documents during the video call.

Do not mirror local video - Movements are opposite of what you would see in a mirror.

Scope and Limitations:

- This feature is currently not supported on mobile devices.
