## How to Add Multiple Providers to an Appointment

Harry - 2023-07-12 - [Scheduling](#)

Sometimes you need multiple providers to co-host a visit. You can now do this with scheduled appointments only. We've added functionality so when you create an appointment, you can add as many co-host providers as you need.

All co-hosts can modify the appointment as needed. They will also have hosting privileges during the video call such as being able to mute-all participants.

When would I use multi-hosted visits?

- For doing breakout sessions during a group appointment.
- For including a back-up provider on the appointment.
- For automatically notifying a front desk admin if the primary provider becomes unavailable.
- For other workflows specific to you.

### How to add multiple providers to an appointment

1. Click "+ more provider" when scheduling a new visit.

2. Review details and click the "Confirm" button if everything is correct.
