

How to Complete Patient Information (eRX)

Jay-Ileen (Ai) - 2024-03-14 - VSee Clinic for Providers

It is important that the Patient's required information has been added in order for the Provider to prescribe medications.

The required fields are:

- First Name
- Last Name
- Address
- City
- State
- Phone Number
- Date of Birth
- Weight
- Height

As a Provider, you cannot prescribe for a Patient whose information is not completed. You would have to ask the Patient their details during the call so you can fill it up for them.

1. Fill in Patient details: **First Name, Last Name, Address, City, State, Zip, Phone Number** until **Date of Birth**.

2. As soon as you added all of the information from First Name to Date of Birth, there are 2 more required fields that will show up: **Weight (lbs.)** and **Height (in)**. Fill in those fields as well and then click on **Update**.

Once you have successfully added all the required fields, the DoseSpot window will launch and you can now start prescribing for the Patient.

PRESCRIPTION

Aileen White, Female, 5 yrs

Add/Edit Drug Allergies Add/Edit Pharmacies

Coverage Details

No eligible coverages found.

Add Prescription Add Patient Reported

Active Medications Inactive Medications Medication History
