

How to End a Call for a Single Participant

Janette Esteban - 2022-12-16 - VSee Clinic for Providers

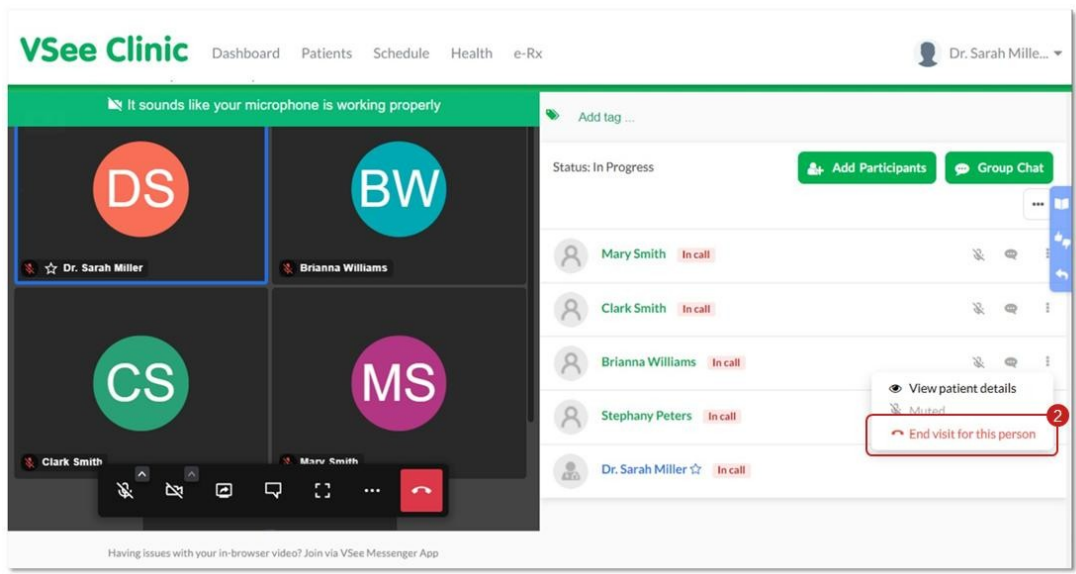

With the accessible Individual Participant Controls, Provider can end a visit for a selected Participant of a Group appointment. This resolves concerns that are only associated to a single Participant.

Ending a Call for a Single Participant During the Visit

1. On the right side of your divided video screen, click on the **ellipsis button**.

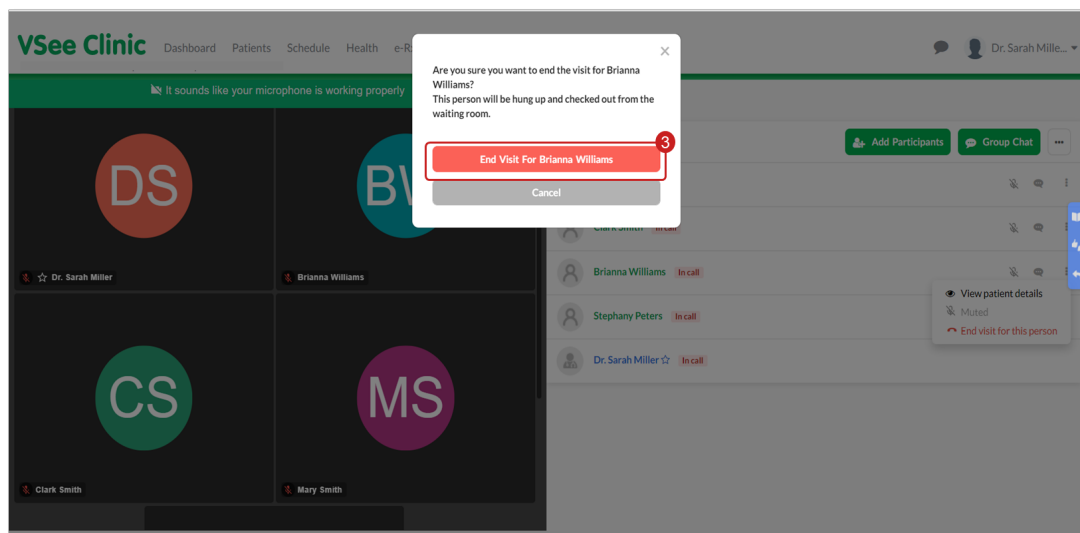

2. Click on **End visit for this person**.

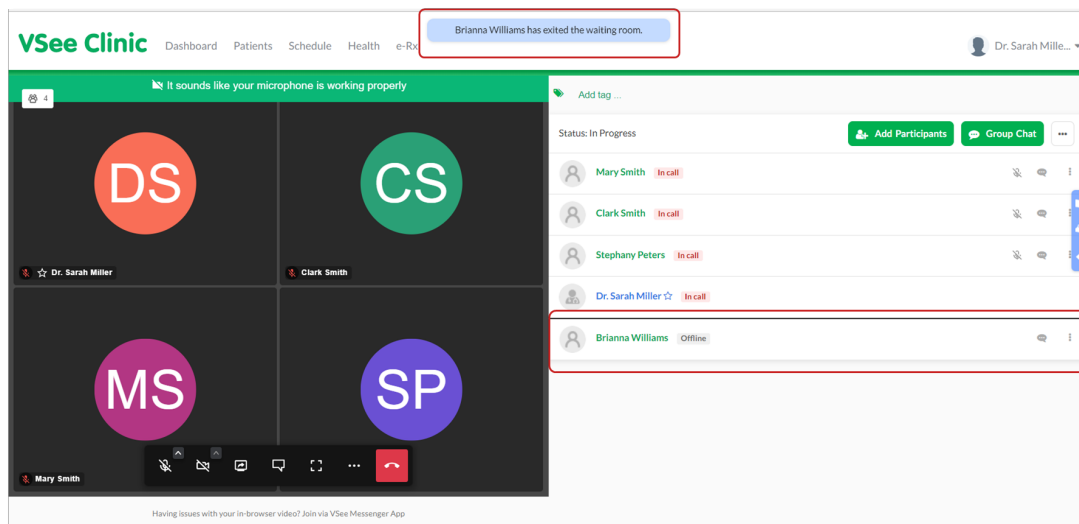

Note: Ending a Visit for a specific Participant will not notify the other Participants.

3. Select “**End Visit For (Name of the Participant)**”.

Once the Provider has ended the call with a selected Participant. There will be a pop-up note that says “**(Name of the Participant) has exited the waiting room**”

Scope and Limitations

- Participant that has been removed from the Call will appear on the Visit Page as Offline and will be below the black line indicating that he/she is not part of the Call anymore.
- Participant that has been removed from the Call can still rejoin the Visit as long as it is still In Progress.
