Start Sending Invitations

There are a few scenarios where sending an invite to a Patient is needed;

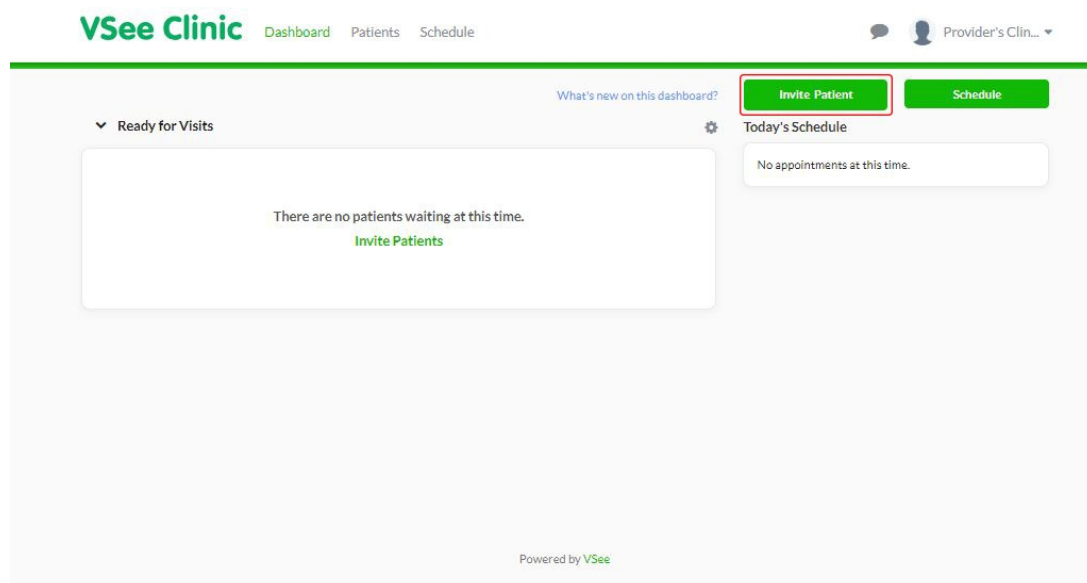

1. When the clinic has been set up, you can start introducing it to your Patients by sending the invite link.
2. If a recurring patient forgot the link to your clinic.

This option is different from setting an appointment for a patient. Check: [Schedule an Appointment with a Patient](#).

- Invite Link is not a [scheduled appointment](#).

- The **Invite Patients** feature is best used for guest walk-in visits.
