How to Log in using MFA on VM

Jay-Ileen (Ai) - 2023-07-12 - [VSee Messenger \(Providers and Patients\)](#)

Multi-Factor Authentication or MFA give VSee Messenger Organizations an extra layer of security as the Providers need to pass an additional verification step to access their accounts.

This feature is enabled upon request for Organizations only (not solo-Providers), please contact [Sales](#) or your Account Manager to enable this feature in your Organization.

Setting up MFA for the First Time

If your account belongs to an organization that requires MFA, you will have to set up your account.

Note: This is a one-time setup process.

After logging in to your existing email address, you will need to download and use the Google Authenticator app or any similar authenticator app.

[Can't scan the QR code?](#)

Secure Your Account

On your phone, download your preferred authenticator app and manually enter the following code. Then enter the provided one-time code below.

H43SC3SMKFTC4YLLG5XWQV2LJNTVU
TJZ

Copy code

Enter your one-time code

Continue

After successfully scanning the QR code or adding the manual code in the authenticator app, you will be asked to copy and safely store a recovery code.

You will need this code if you lose access to the device where the authenticator app is installed.

VSee

Almost There!

Copy this recovery code and keep it somewhere safe. You'll need it if you ever need to log in without your device.

I have safely recorded this code

Continue

You will also be asked if you want to trust the device you're using to log in.

If you click **Continue**, you will be asked to create a passkey which will be stored in the current device and web browser that you're using.

VSee

Log In Faster on This Device

Trust this device? You can quickly and securely log in the next time using this device's fingerprint or face recognition.

Remind me later

[Not on this device](#)

Storing this passkey will allow you to use your device's built IT biometric features such as touch ID (fingerprint) or face ID (facial recognition), instead of needing to type in the one-time code from your authenticator app each time you log in.

For Windows/Desktop users who have security PIN codes, you will need to input the security PIN code to proceed.

You will be automatically logged in after the MFA set-up steps are completed.

Logging in after MFA Setup

After you have successfully set up MFA for your account, the next time you log in, you will have quicker and

more secure options to log in.

Log in with your existing email address.

You will see your VSee Messenger log-in page.

You may enter your Username (email) and then click the **Continue** button to go through the login flow.

You will be asked to verify your identity using your default authentication option before logging in.
Get the one-time code by opening your preferred authenticator app.

VSee

Verify Your Identity

Check your preferred one-time password application for a code.

[Try another method](#)

In case you've added this device as a trusted device, the default authentication option would be your device's biometrics feature such as touch ID (fingerprint) or face ID (facial recognition).

VSee

Use fingerprint or face
recognition to login | VSee
Messenger

Press the button below and follow your
browser's steps to log in.

[Try another method](#)

In case you wanted to try verifying using another method, you may click **Try another method** to see a list of other available factors they may use to continue the verification.

If you click **Email** as a method that you would like to use to verify, here is the page that you will see.

You will receive the one-time code in your account's registered email.

You will then need to copy and paste or type in the one-time code (Usually a 6-digit code) in the field below. And you may also try to click the Resend button if you didn't receive the code.

[Try another method](#)

If you click **Recovery code** as a method that you would like to verify, here is the page that you will see.

You will need to input the recovery code which was given to them during the 1st time you set up MFA, and click **Continue**.

In case you've run out of methods or have completely lost access to any of their registered factors, you will need

to request VSee admin via VSee customer support to reset your account's MFA.

You will be automatically logged in after the MFA set-up steps are completed.

Note: Users will see the normal login page if their account belongs to an organization that does not require MFA. They may log in normally, the same as before.
