

## How to Mute a Participant

Jay-Ileen (Ai) - 2023-07-10 - VSee Messenger (Providers and Patients)

There are two ways to mute participants: Mute a single participant or Mute All.

### Mute a Participant

1. Hover over the video window of the participant you would like to mute.
2. Click **More**.
3. Select **Mute** from the menu option.

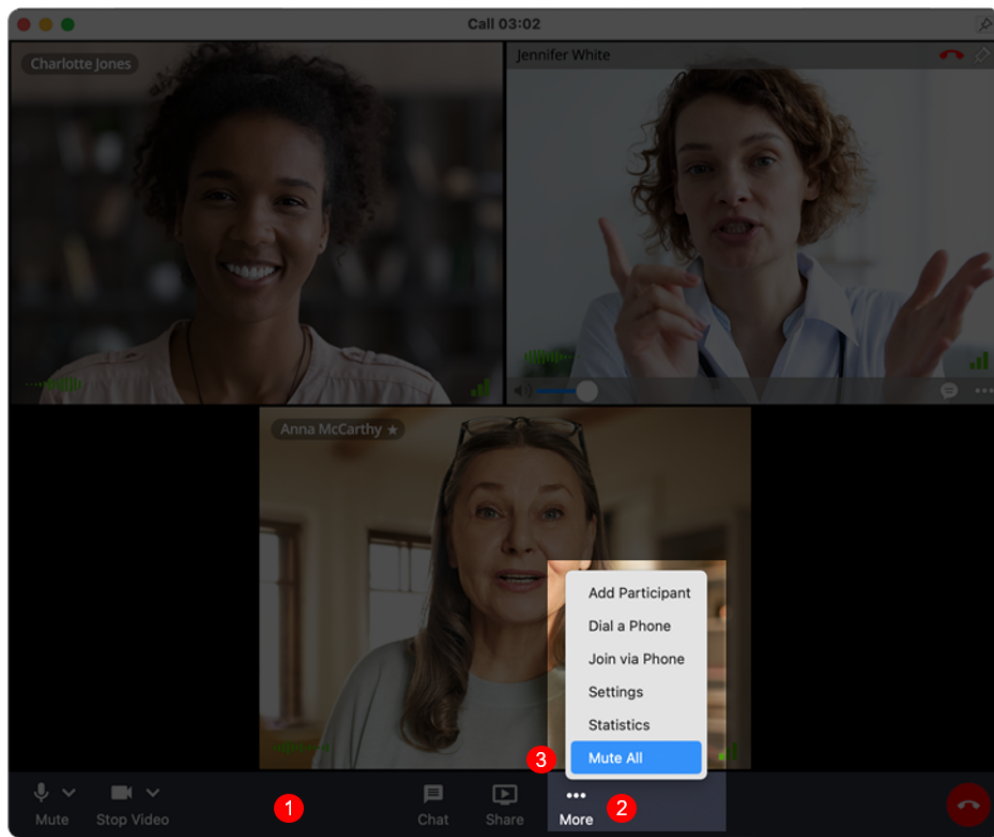

4. Once the confirmation pop-up appears, click on the **Mute** button.

### Mute All Participants

1. Navigate to the bottom of the main video window.

2. Click **More**.
3. Select **Mute All** from the menu option.

4. Once the confirmation pop-up appears, click on the **Mute All** button.

### Scope and Limitations:

- Only [hosts](#) can mute participants.
- Participants who have been muted will be muted for everyone in the call, not just for the host.
- Host cannot unmute participants.
- Participants who have been muted by the host can unmute themselves at any time.
- Users on older versions of the VSee Messenger and those who connected through the dial-in number won't be muted.
