

How to Send Reminders

- 2023-07-12 - Scheduling

For confirmed scheduled appointments, VSee Clinic automatically sends two notifications to both provider and patient via email and/or SMS (if SMS is enabled):

- Appointment confirmation - sent right after the appointment is confirmed.
- Appointment reminder - sent 24 hours by default before the actual appointment time.

However, patients may sometimes miss an appointment due to various reasons (email went to spam, forgot the details or the notification was accidentally deleted). With this feature, a provider or clinic admin can manually re-send the appointment reminder to the same patient from the calendar or visit record.
