

How to Use the Analytics Dashboard

Jay-Ileen (Ai) - 2024-04-17 - VSee Clinic for Admins

The Analytics Dashboard is a smart tool available for the Admin and Analyst user roles to help you understand your Clinic data.

[What can I do with the Analytics Dashboard?](#)

[What are the different kinds of supported widgets?](#)

Note: This feature is only available for user roles (i.e. Admin, Analyst) with access to Reports. Please [Contact Sales](#) or your Account Manager to enable this feature in your Clinic.

Features of the Analytics Dashboard

- Self-customize your Data Analytics Dashboard with easy drag-and-drop data widgets. Control how you want to display and organize data that's most important to you. Choose from the options to present data through numbers, spreadsheet and chart widgets. Fast export only the data displayed in a widget with a single click.

Supported Widgets

There are 3 kinds of supported widgets - numbers, spreadsheet, and chart widgets.

1. Number Widgets

Total Visit

Counts **In-progress** & **Completed visits** only (*regardless visit type: appointment, walkin, invite, e-consult*)

Total Visit

2,993

-54% previous period

Avg Visit Duration

Counts **walk-in** and **invited visits** only (regardless of visit status: pending, in-progress, completed, or deleted)

Avg Visit Duration

2.6m

-40% previous period

Avg Wait Time

Counts **walk-in**, and **invited visits** only (regardless of visit status: pending, in-progress, completed, or deleted)

Avg Wait Time

2.5m

-18% previous period

Payment Collected

Counts every visit (*regardless of visit status, type*)

Payment Collected

\$10,345

-55% previous period

Active Clinics

Active: if there is a patient/provider active in the Clinic

Active Clinics

3,100

+22% previous period
