Is VSee HIPAA compliant?

- 2023-09-07 - FAQs

VSee and HIPAA

VSee video chat helps you to be HIPAA compliant in two ways:

1. It protects data privacy in that all audio/video communication is securely encrypted in transit and at rest.
2. VSee offers the **HIPAA-required Business Associate Agreement (BAA)** where VSee agrees to be responsible for keeping all patient information secure and to immediately report any breach of personal health information.

HIPAA Secure vs. HIPAA Compliant

All VSee solutions are **HIPAA secure** as it meets (and even exceeds) HIPAA security standards (256 bit AES). VSee has several characteristics that make it easy to protect the confidentiality of protected health information.

For **HIPAA compliance**, a healthcare provider needs to sign a **Business Associate Agreement (BAA)** with their video chat vendor (in this case, VSee). VSee offers the HIPAA-required Business Associate Agreement where VSee agrees to be responsible for keeping all patient information secure and to immediately report any breach of personal health information.
