

Room Settings

Joel Barcillo - 2023-06-15 - Clinic Admin Guides

Under the Room tab, the different rooms under the clinic will be displayed. Each Clinician will have their own room automatically created once they are signed up to the platform.

This is where you can add a new room, edit, delete, or clone an already existing room.

The screenshot shows the 'Rooms' management page in the Welch Allyn Home application. The top navigation bar includes 'Welch Allyn Home', 'Dashboard', 'Clinic', 'Rooms' (selected), 'Users', 'Report', and 'Audit logs'. A user profile for 'Jake Wallin' is in the top right. The main content area is titled 'ROOMS' and features a 'Show Inactive Rooms' checkbox and a '+ New Room' button. A table lists the rooms with columns: Domain, Slug, Name, Code, Status, Providers, and Action. One room is listed: 'wah-jakevsee.me' with slug 'clinic', name 'Jake Wallin's Clinic', code 'ai5sq', status 'Active', and provider 'Jake Wallin (joel.)'. The bottom of the table shows pagination: 'Showing 1 to 1 of 1' and '25 / page'.

Domain	Slug	Name	Code	Status	Providers	Action
wah-jakevsee.me	clinic	Jake Wallin's Clinic	ai5sq	Active	Jake Wallin (joel.)	[Edit] [Delete] [Clone]

Please note that this function is not necessary for the clinic admin workflow at the moment.

Caution: Do not change the settings here to avoid clinic malfunction.
