State and Specialty Mapping

Jay-Ileen (Ai) - 2022-12-28 - VSee Clinic for Providers

State Mapping

For clinics that serve the multi-states area of America, State mapping is essential so that providers can attend to patients according to the states that are only allowed for their license.

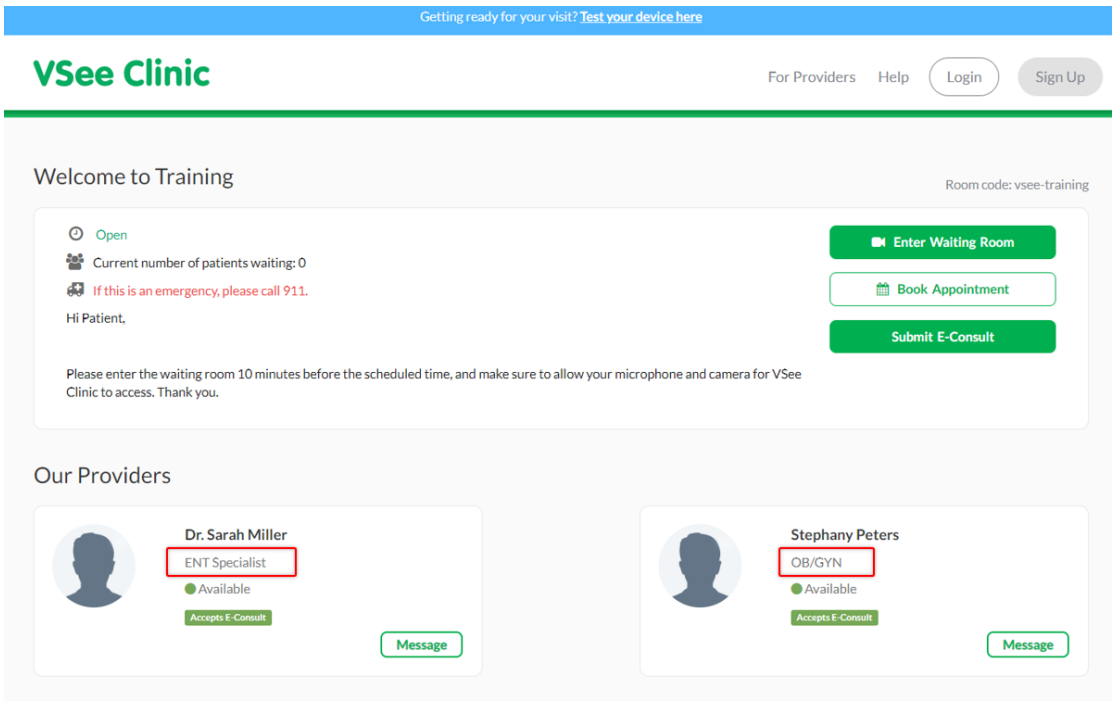

During the intake process, patients can select the state they are located and if there are multiple time zones in that state, they can also select their actual timezone; the same process goes for Clinic Schedulers.

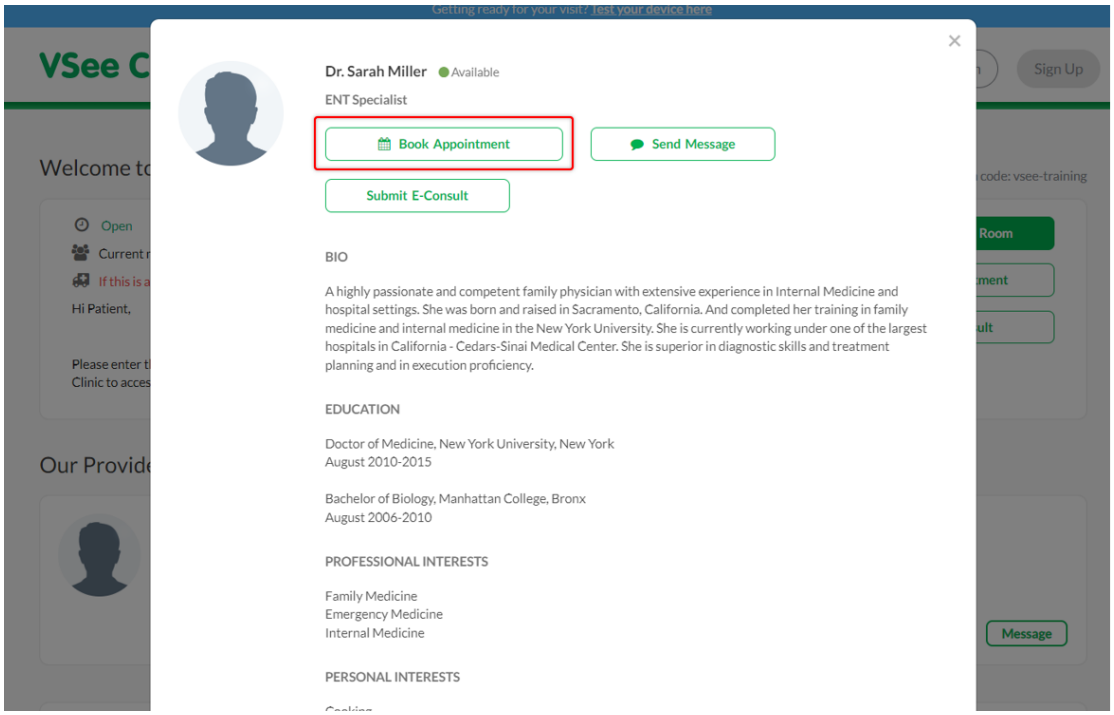

Specialty Mapping

Patients can choose their preferred provider according to their specialties. The Providers' specialties will reflect on the landing page of the clinic.

Once the patient selects the Provider by clicking on their name, they will be able to view the Provider’s profile and can book an appointment with that chosen provider.

If you have any questions, please contact us at help@vsee.com.
