

## State and Specialty Mapping

Jay-Ileen (Ai) - 2022-12-27 - VSee Clinic for Providers

### State Mapping

For clinics that serve the multi-states area of America, State mapping is essential so that providers can attend to patients according to the states that are only allowed for their license.

During the intake process, patients can select the state they are located and if there are multiple time zones in that state, they can also select their actual timezone; the same process goes for Clinic Schedulers.

The screenshot shows a web form titled "State and Specialty Mapping" with a progress indicator "Step 2 of 4". The form has three main sections: "Visit Option" (Intake - 60 Minutes), "Name of Service" (Outpatient Appointment), and "Location" (Texas). Below these, there are fields for "Timezone", "Date and Time", and "Provider Name". The "Location" section displays a grid of state buttons: Arizona, Arkansas, Florida, Georgia, Idaho, Illinois, Kentucky, Maine, Maryland, Missouri, New Mexico, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas (highlighted with a red box), Virginia, and Washington. Below the grid, there is a "Timezone" dropdown menu (highlighted with a red box) with options: "Select a timezone", "UTC-06:00 Central Time (US & Canada)", and "UTC-07:00 Mountain Time (US & Canada)". At the bottom right, there are "Previous" and "Next Step" buttons. The footer indicates "Powered by VSee".

### Specialty Mapping

Patients can choose their preferred provider according to their specialties. The Providers' specialties will reflect on the landing page of the clinic.

Once the patient selects the Provider by clicking on their name, they will be able to view the Provider's profile and can book an appointment with that chosen provider.
