

State and Specialty Mapping

Jay-Ileen (Ai) - 2022-12-27 - VSee Clinic for Providers

State Mapping

For clinics that serve the multi-states area of America, State mapping is essential so that providers can attend to patients according to the states that are only allowed for their license.

During the intake process, patients can select the state they are located and if there are multiple time zones in that state, they can also select their actual timezone; the same process goes for Clinic Schedulers.

The screenshot displays a form for state and specialty mapping. At the top, there are several fields: Visit Option (Intake - 60 Minutes), Name of Service (Outpatient Appointment), Location (Texas), Timezone (--), Date and Time (--), and Provider Name (--). Below these is a 'Location' section with a grid of state buttons. The 'Texas' button is highlighted in blue. Below the grid is a 'Timezone' dropdown menu with the following options: 'Select a timezone', 'UTC-06:00 Central Time (US & Canada)', and 'UTC-07:00 Mountain Time (US & Canada)'. The 'Next Step' button is visible at the bottom right. The form is powered by VSee.

Specialty Mapping

Patients can choose their preferred provider according to their specialties. The Providers' specialties will reflect on the landing page of the clinic.

Once the patient selects the Provider by clicking on their name, they will be able to view the Provider's profile and can book an appointment with that chosen provider.

Welcome to Training

Room code: vsee-training

Open
Current number of patients waiting: 0
If this is an emergency, please call 911.
Hi Patient,

Please enter the waiting room 10 minutes before the scheduled time, and make sure to allow your microphone and camera for VSee Clinic to access. Thank you.
