What is the Participant List

Janette Esteban - 2022-12-22 - VSee Clinic for Providers

In the new Visit page, Participants from the Participant List are color-coded to easily distinguish their roles in the visit. From the same view, there is also a black line that separates the Patients who are currently in the call and those who have left or have not joined.

Color Indicators

- Blue for Providers, whether it's the primary or secondary providers
- Green for Patients who are with scheduled appointment
- Black for guests and interpreters, whether they came in via guest-invite link, dial-in/dial-out

Note: Once the Providers and Patients are ready for the visit, they will automatically be part of those participants above the black line.
