

What is Patient Queue Auto-Sorting

Jay-Ileen (AI) - 2024-05-20 - VSee Clinic for Providers

VSee Clinic now has the Waiting Room Dashboard Sorting that allows the Provider or Clinic staff to sort the ongoing visits of the Clinic.

There are two ways to sort the visit:

1. Wait Time
2. Triage Condition

Sorting by Wait Time

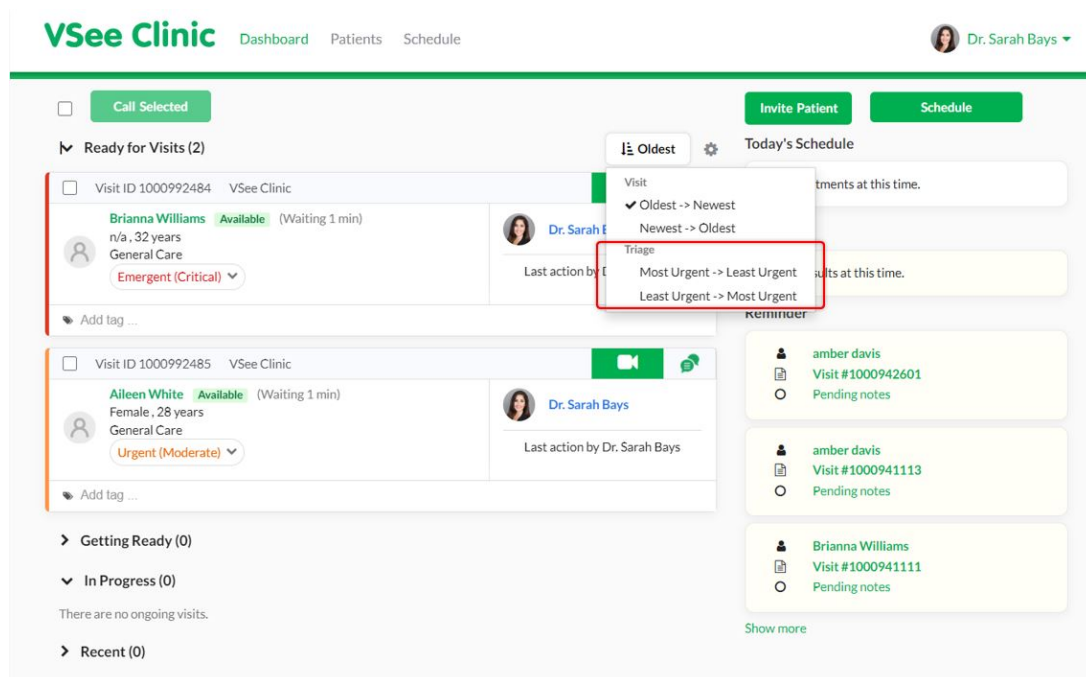

From the Waiting room Dashboard, you can choose to sort the visit by **Oldest** to **Newest** or by **Newest** to **Oldest**.

The screenshot displays the VSee Clinic interface. At the top, there's a navigation bar with 'VSee Clinic', 'Dashboard', 'Patients', and 'Schedule'. A user profile for 'Dr. Sarah Bays' is visible in the top right. Below the navigation bar, there are buttons for 'Call Selected', 'Invite Patient', and 'Schedule'. The main section is titled 'Ready for Visits (2)'. It lists two patients: Brianna Williams (Waiting 1 min, Emergent (Critical)) and Aileen White (Waiting 1 min, Urgent (Moderate)). A dropdown menu is open, showing sorting options: 'Visit' (Oldest -> Newest, Newest -> Oldest) and 'Triage' (Most Urgent -> Least Urgent, Least Urgent -> Most Urgent). The 'Visit' dropdown is highlighted with a red box. On the right, there's a 'Today's Schedule' section with a list of visits and pending notes.

Note: Currently, Sorting by Wait Time is enabled by phases for most The Patient Queue Auto-Sorting (based on wait time) will be enabled on the Waiting Room Dashboard in phases starting on the day of the release and will be fully enabled by the next release — VC 6.0.1.

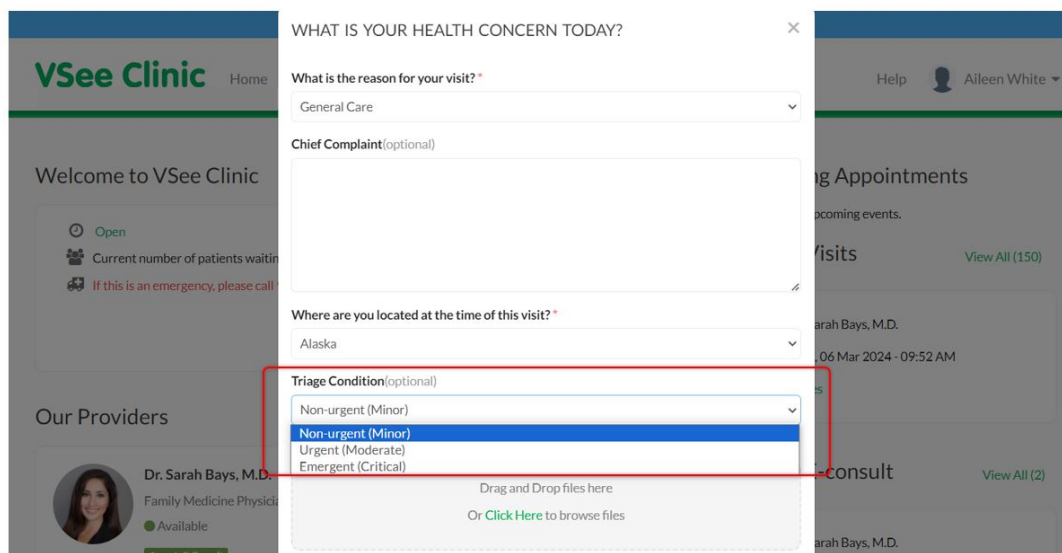

Sorting by Triage Condition

From the Waiting room Dashboard, you can choose to sort the triage condition by **Most urgent** to **Least urgent** or by **Least urgent** to **Most urgent**.

On the Patients side, during the Intake process, they would be able to select the level of urgency of their visit under the **Triage Condition** dropdown.

They can select **Non-urgent (Minor)**, **Urgent (Moderate)**, or **Emergent (Critical)**.

On the Provider side, the Provider or the Clinic staff can edit or update the Triage Condition on the Waiting Room Dashboard.
