VSee Clinic 6.3 - Enhanced Group Chat Controls and New Visit View Filter

2024-10-29 - Jay-Ileen (Ai) - VSee Clinic

VSee Clinic 6.3 launches on October 21! This update includes bug fixes and UI enhancements and functionality to improve your overall experience.

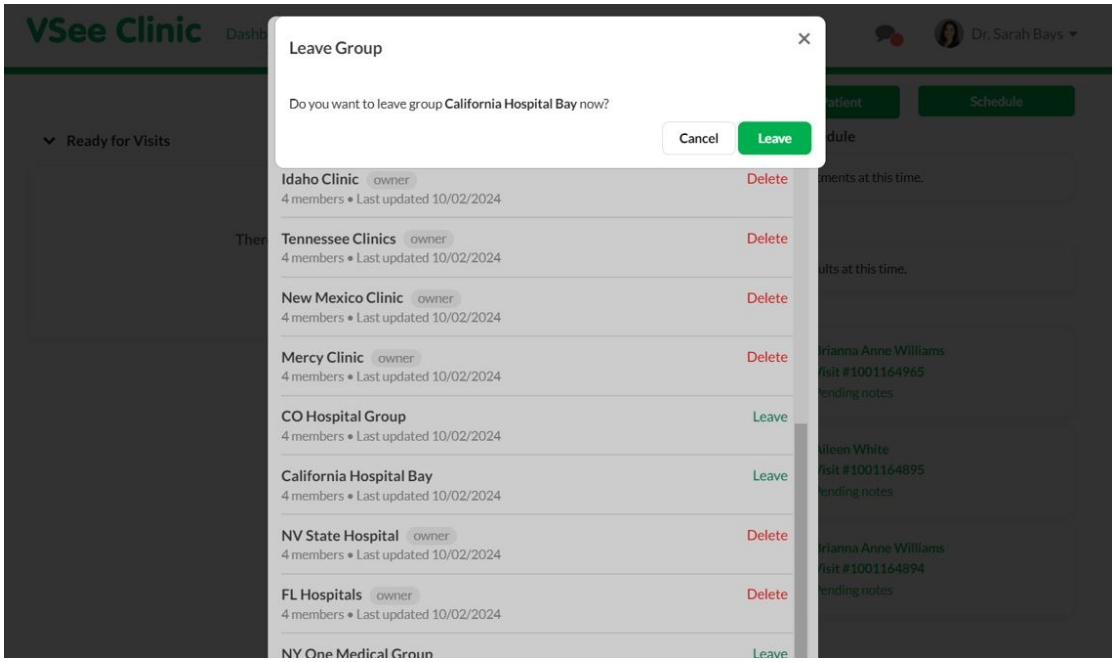

Improved Group Chat Management

For Clinics that utilize the Chats page, you will receive notifications when you need to manage your group chats.

Now, you have more options to decide which group chats to keep, archive, hide, delete.

For detailed steps on managing group chats on the VSee Clinic, check out our new KB article here.

Note: Please contact your Account Manager if you'd like to enable this feature in your Clinic.

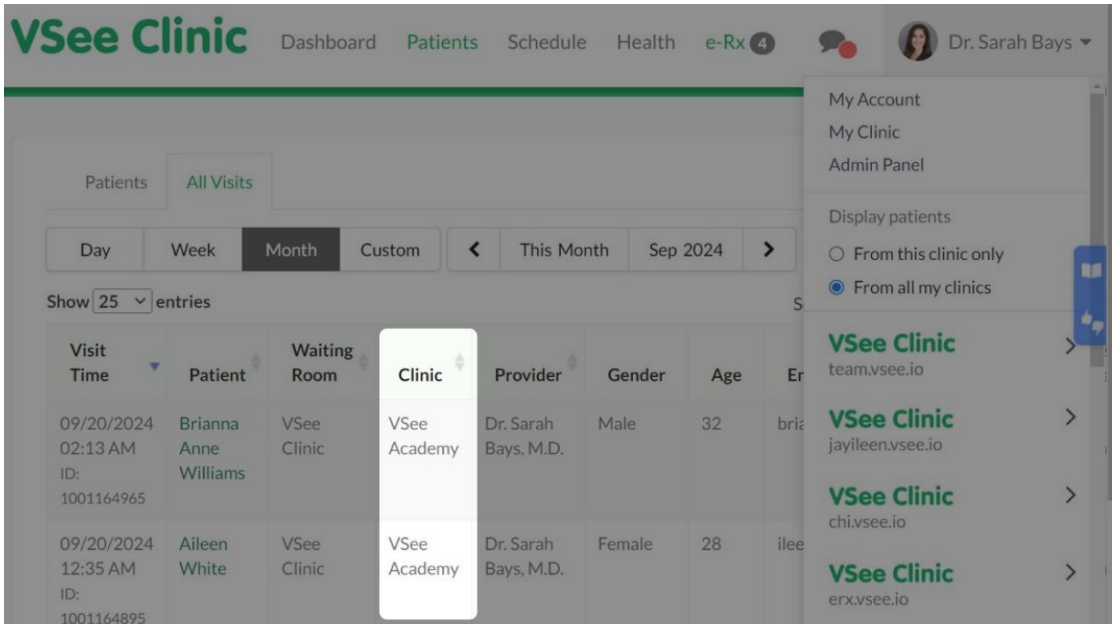

Filter Visit Views by Clinic

For Providers who see patients from multiple Clinics, you can now conveniently see which Clinic your patient visit came in from. You can also now filter your Visits by Clinic.

Under the “All Visits” tab you will now see a new column — Clinic. When you select the “Display from all my clinics” option on your Profile Menu, this column will show the name of the Clinic from which the visit was made. When you select the “Display from this clinic only” option, only the visits from the selected clinic will be listed; visit information of patients from other clinics will not appear.

Read more on how to switch your All Visits view here.

Clinic Performance Enhancement

Also, more website optimization has been done for VSee Clinic to reduce load time and increase performance.

If you have any questions related to this release, please contact us at help@vsee.com.
