VC 7.2: Smarter AI Notes, Easier Scheduling, Analytics Updates

2026-10-08 - Francis - [VSee Clinic](#)

VSee Clinic 7.2 releases on October 7. Providers get more control over documentation and easier scheduling; Clinic Admins get a stronger analytics dashboard.

- **Calendar list view** — The Schedule page now offers a List view alongside Month, Week, and Day. See slots and appointments in one chronological list with date, time, provider, and practice.

2 Oct, Fri	11 AM - 11.15 AM	Dr. Sarah Bays - Brianna Williams
	1.10 PM - 5.30 PM	Dr. Sarah Bays - VSee Academy

- **Faster provider selection** — When patients book, the provider list is now sorted A-Z and searchable by name. "Any Provider" stays pinned at the top, and selecting a provider filters available times to that provider only.

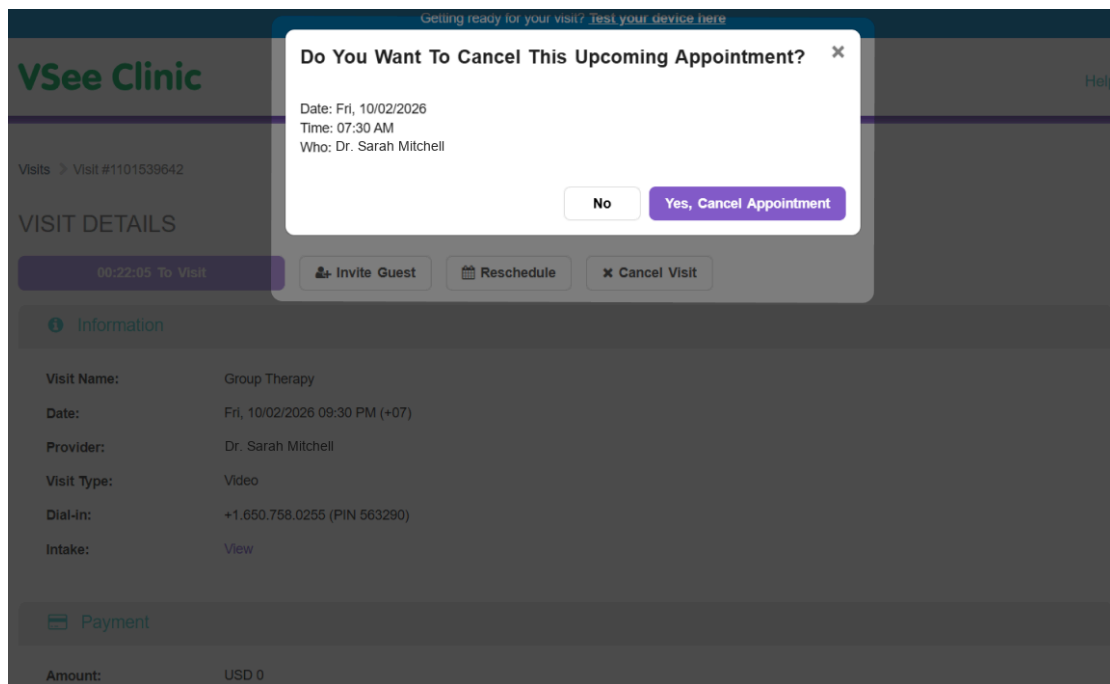

The screenshot shows a mobile app interface with a dark blue header bar containing the text "Getting ready for your visit? Test your device here". Below the header is a modal window titled "Please Select Your Available Time" with a close button (X) in the top right corner. The modal is divided into two sections: "Date" and "Provider".

The "Date" section displays a calendar for September 2026. The days of the week are abbreviated as Mo, Tu, We, Th, Fr, Sa, Su. The dates are arranged in a grid. The date 30 is highlighted with a blue square.

The "Provider" section is a dropdown menu with the title "Provider". The dropdown is open, showing a list of providers. At the top is "Any Provider" with a downward arrow. Below it is a search bar with a magnifying glass icon. The list of providers includes: Amanda Reyes, Benjamin Carter, Catherine Liu, Daniel Okafor, David Patel, Elena Novak, and Emily Brooks. Emily Brooks is highlighted with a blue background.

- **Group Visits self-service** — Patients can now book and cancel

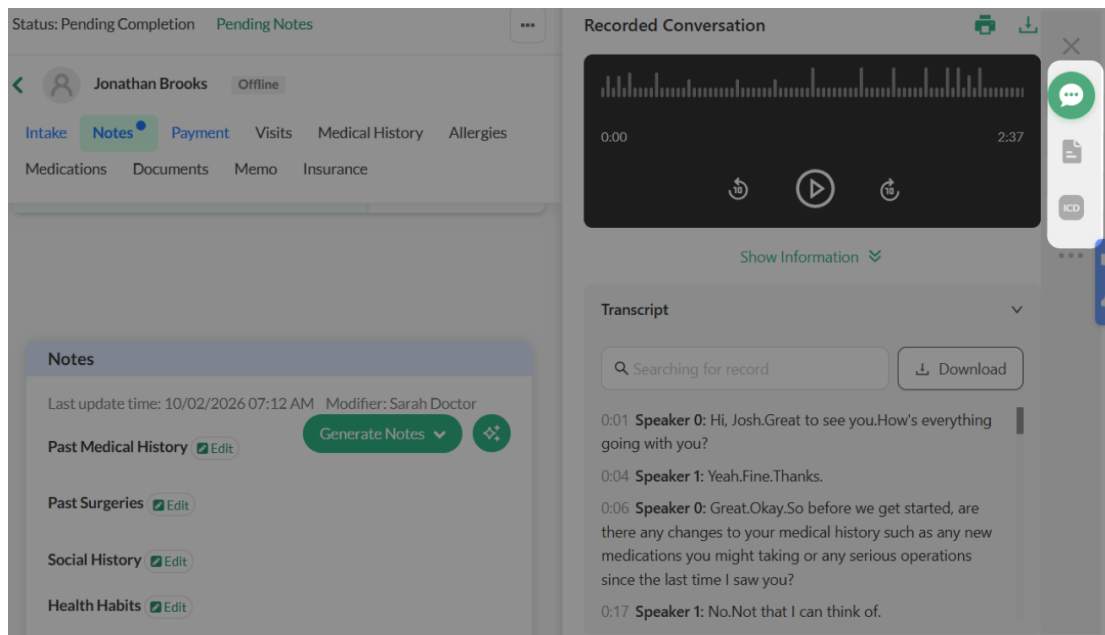

Group Visit appointments on their own, without contacting the clinic.

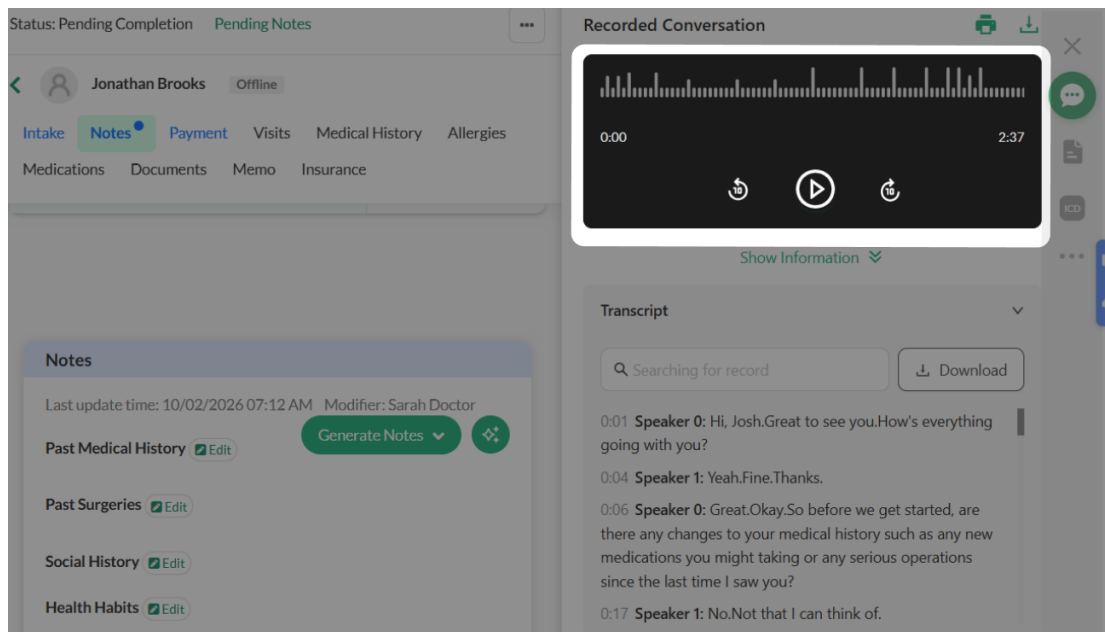

- **Cleaner web chat on login** — The chat list now shows only new or unread chats and is collapsed by default.

—

- **A more organized AI workspace** — SOAP Notes now has three dedicated tabs: Conversation, Notes, and ICD. Everything you need is in one view.

- **Transcription control** — Pause and resume live transcription to capture only the clinical portions of the visit and keep transcripts concise.

- **See the "why" behind AI suggestions** — Generated notes now include a **Reasoning** section explaining how the AI arrived at its suggestions from your transcript.

Reasoning

The clinician observed decay in one of the patient's lower molars and recommended a filling. The patient denied any current dental pain. The discussions mainly focused on the discovery of decay and advice on future dietary consultations, with no other specific dental health topics raised.

Start Time

03:46 AM

HPI

A limited telehealth screening examination was performed. The provider observed decay in one of the patient's lower molars and recommended a filling.

Append all

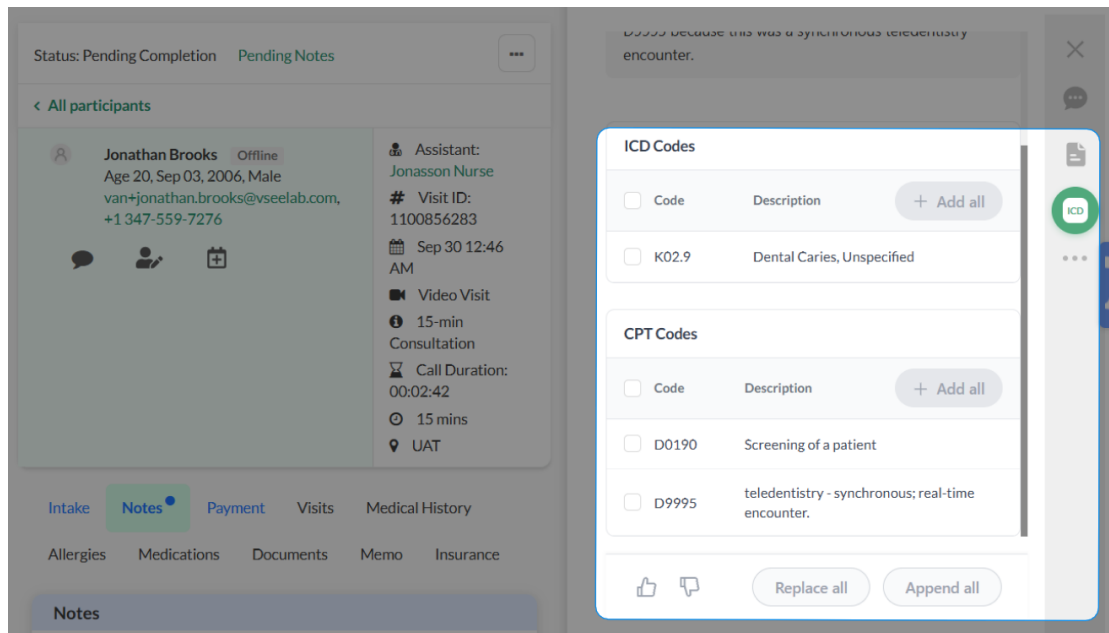

- **Group Notes for Group Visits** — Providers can document a Group Visit with a Group Note.

For those who want a deeper look at the VC 7.2 infrastructure:

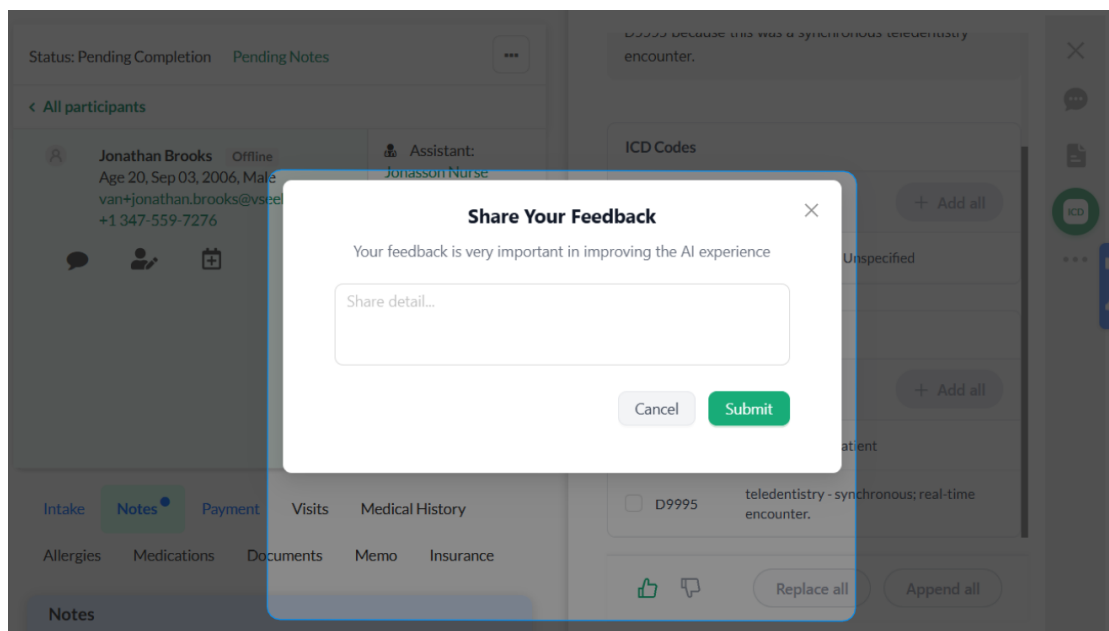

AI SOAP Notes

- **Integrated ICD workflow** — The ICD tab is now part of the UI, alongside Conversation and Notes, streamlining the coding process.

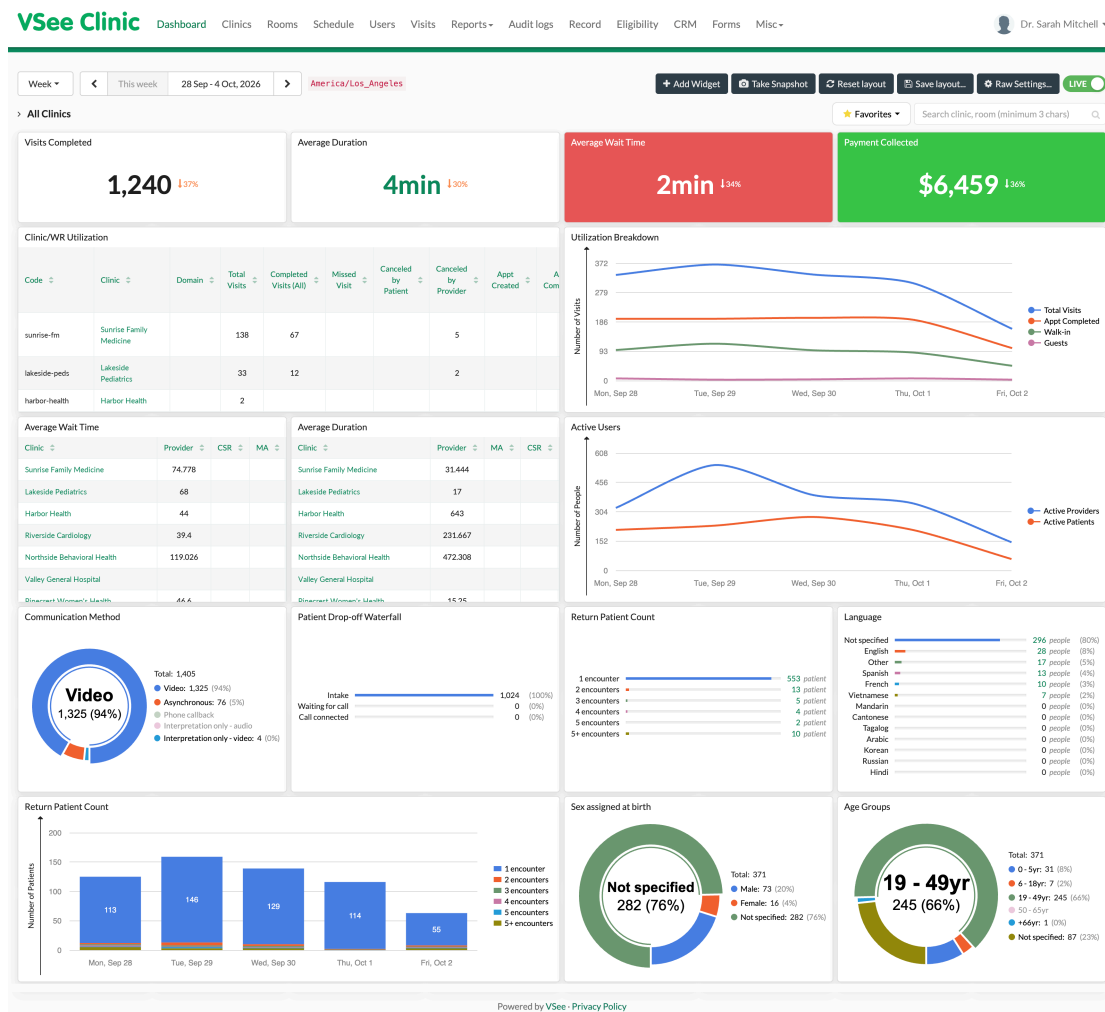

- **Feedback mechanism** — A Like/Dislike loop lets users give direct input on AI accuracy for continuous model refinement.

- **Framework migration** — The core analytics engine now runs on the standard VSee Clinic framework, improving cross-platform stability and rendering speed.
- **Advanced visualizations** — Added patient demographic views (age/gender) and richer charting for visit trends and average wait times.
- **Updated KPI tracking** — Enhanced schemas for visit volume, appointment completions, walk-ins, duration, and payment collections.
