VM 4.28 Release - Pin Messages, Bookmark Chats, See Status on Mobile

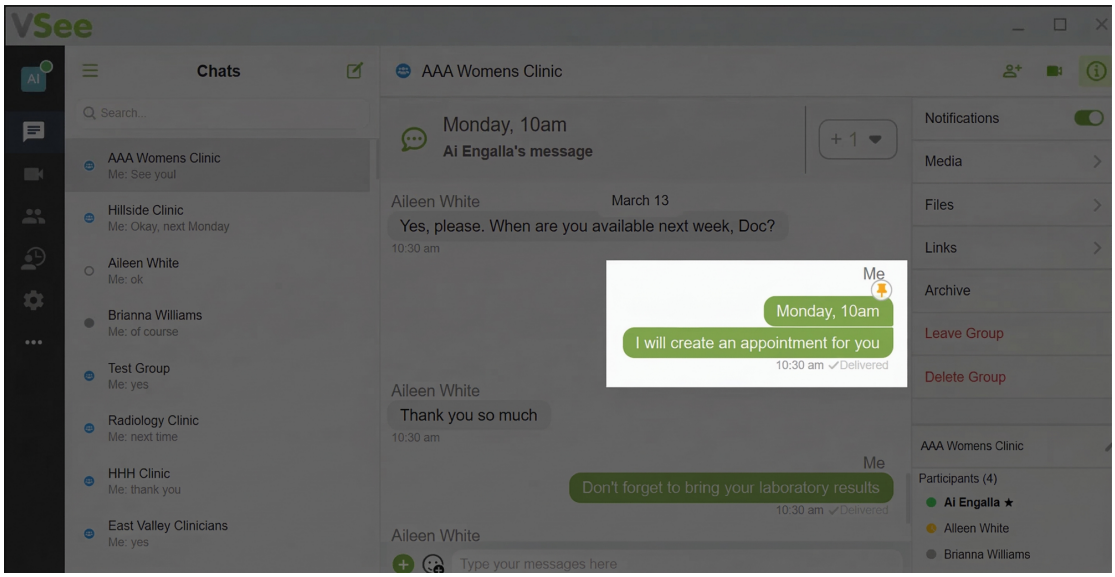

2026-03-20 - Jay-Ileen (Ai) - VSee Messenger

We're excited to announce the latest release of VSee Messenger, available starting **March 20**. This update brings new ways to organize your chats, find what you need faster, and connect more seamlessly, whether you're on desktop or mobile.

Pin Important Messages to the Top

Ever had to scroll forever to find that one message with an address or instructions? Now you can pin it to the top of the conversation instead.

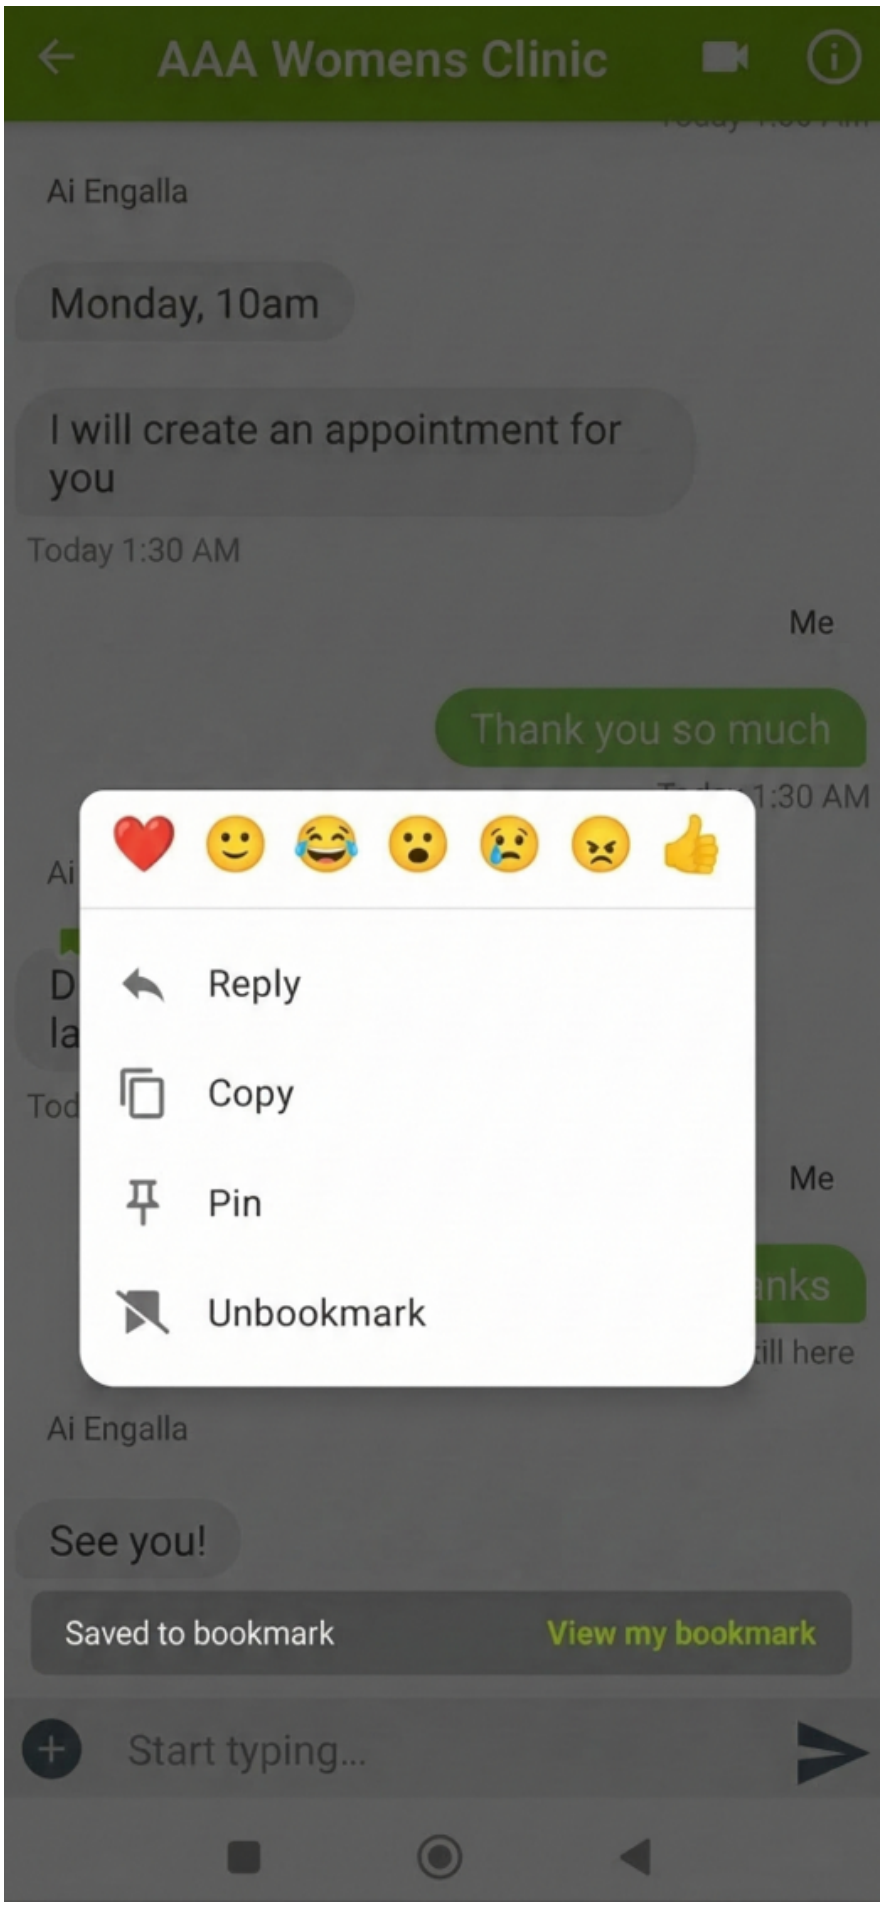

Just select a message, choose Pin, and it stays right where you can see it. Click the pin icon anytime to view everything you've pinned, and unpin whenever you're done.

Bookmark Messages Now Available on Android

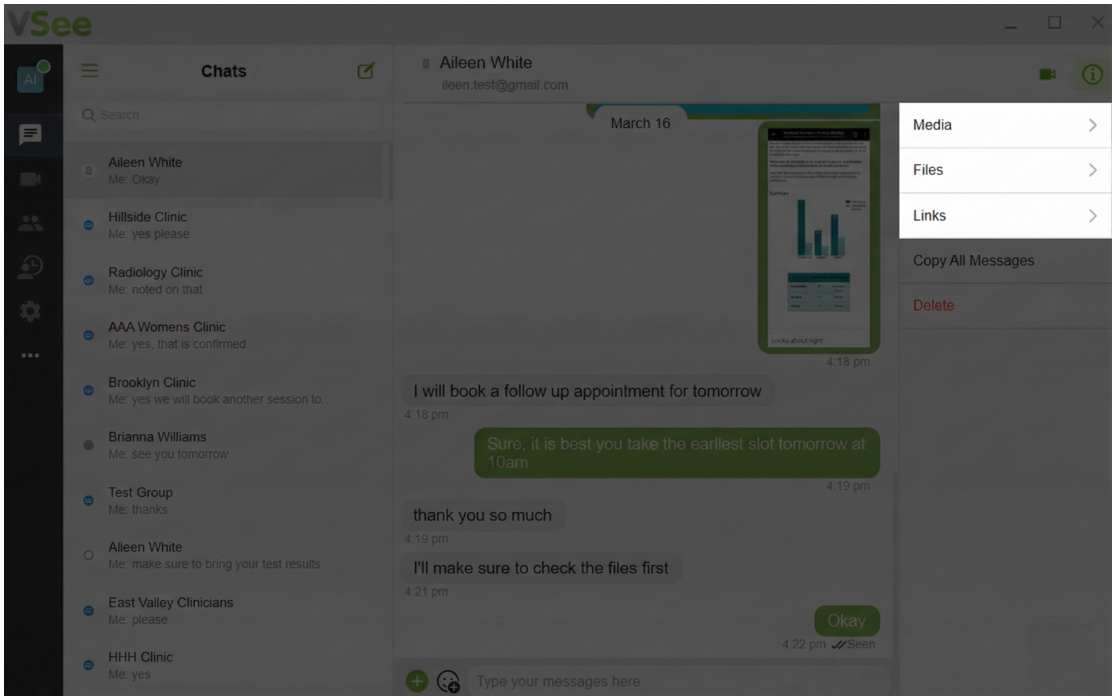

Android users — you can now save important messages and find them later in the "My Bookmark" tab. No more screenshots or scrolling endlessly to find what you need. Remove bookmarks anytime just as easily.

Note: Already available on iOS and macOS. Coming to Windows in the next release.

View Media, Files, and Links in Private Chats, Too!

Now you can see all the photos, files, and links shared in a private chat in one place. No more scrolling back through weeks of messages to find that one document or image.

See Who's Available Right from Mobile

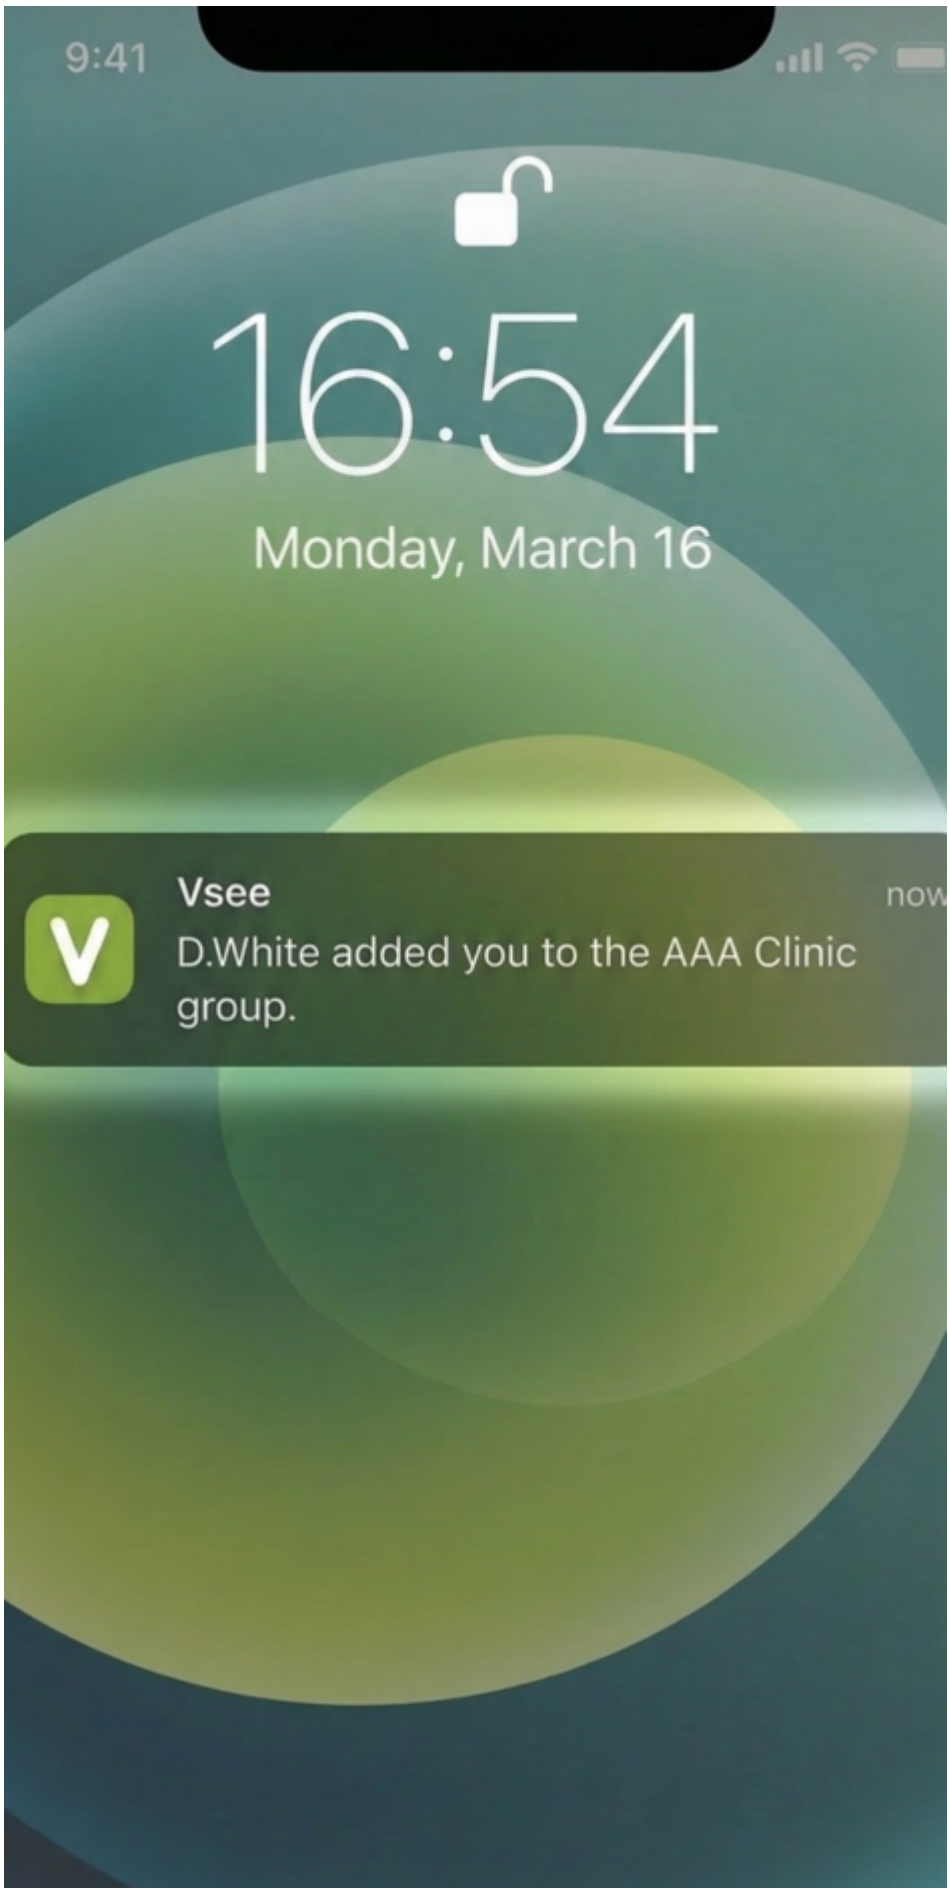

Now on both iOS and Android, your mobile chat shows you VSee Messenger status just like on desktop. See at a glance who's online, busy, or away.

One-Tap Access to New Group Chats

When someone adds you to a group, just tap the notification and you're in. No hunting around. You'll land right in the chat where you can see the conversation history, members list, and group info.

Now available on Android and Windows. Previously available on iOS and macOS.

Friend Request Notifications Now Open Directly to Chat

Tap a friend request notification, and it takes you straight to the chat with that person. You can accept or decline right there. The request also shows up in your Contact tab if you want to deal with it later.
