VSee

VSee Clinic 4.11.0 – New Drag-and-Drop KPIs Dashboard with Enhanced Data Visualizations

2022-03-21 - Patty - VSee Clinic

Quickly build your KPIs dashboard to monitor the metrics most important to your organization with the improved VSee Clinic Data Analytics Dashboard plus other new features in this VSee Clinic 4.11.0 release.

- Updated – Data Analytics dashboard

- New! Analyst User Role

- New! Give Scheduled Visits a Descriptive Name

1. A More Powerful Data Analytics Dashboard
Now you can self-customize your Data Analytics Dashboard with easy drag-and-drop data widgets. Control how you want to display and organize real-time data and KPIs that are key to you (wait time, completed visits, patient satisfaction, payments collected, etc.). Choose from a host of visualization options and standard reports and set your own parameters. You can also now 1-click export only the data displayed in a specific widget.

Note: These features are only available for user roles (i.e. Admin, Analyst) with access to Reports. Please contact Sales or your Account Manager to enable this feature in your Clinic.

To learn more about the different reports you can readily generate, please click here.
