## VSee Clinic 4.12.0 - New EPCS, Faster Internal Chatting, and More Room Configuration Control

2022-06-21 - Chi - VSee Clinic

Make your practice more productive with the newest features of the VSee Clinic 4.12.0 coming this June 21st.

- New - EPCS (Electronic Prescribing for Controlled Substances)
- New - Faster Internal Chatting with Integrated Staff Web Chats
- New - Room Level Control of Clinic-wide Configurations

### 1. New - EPCS (Electronic Prescribing for Controlled Substances)

We've improved your ePrescribing experience with new EPCS capabilities. Our new ePrescribe platform now allows you to prescribe controlled substances to your patients in addition to regular medications.

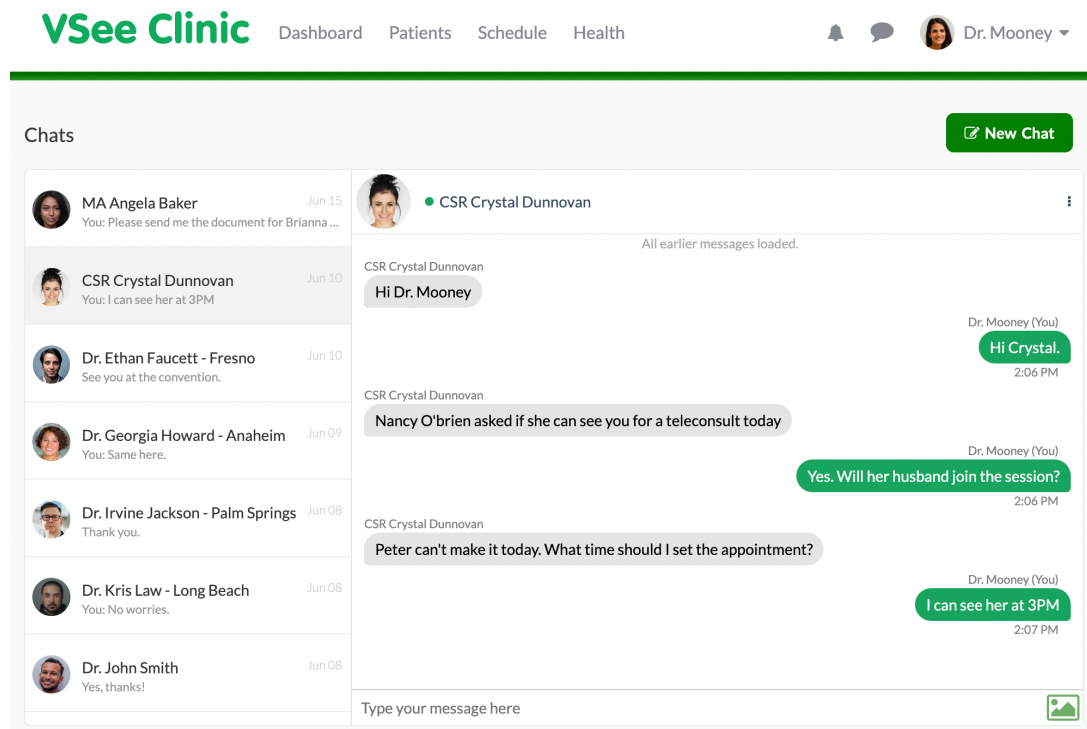

The screenshot displays the VSee Clinic ePrescribe interface. At the top, a 'PRESCRIPTION' header is visible. Below it, a 'Welcome Audit Says' banner includes a reminder to 'Please be sure to run, print, and sign your daily Prescriptions Report today!'. The main area shows patient information for 'Houston Mills, Male, 31 yrs' with buttons for 'Add/Edit Drug Allergies' and 'Add/Edit Pharmacies'. To the right, a 'Coverage Details' box states 'No eligible coverages found.' and buttons for 'Add Prescription' and 'Add Patient Reported' are present. A 'Drug/Allergy Interactions' box highlights an allergy to aspirin. The 'Add Prescription' section is active, showing 'Step 3' with fields for 'Current medication: Adderall (oral - tablet)', 'Schedule II', 'Current strength: 5 mg', and 'Effective Date'. A 'Patient Directions' field is also visible. On the right, a 'Plan Selected For This Medication' section shows 'None Available' with a 'REFRESH' button, and a 'Formulary Status' section showing 'Unknown' with a 'Walk Me Through' button.

**Note:** Please contact [Sales](#) or your Account Manager to enable the ePrescribe feature in your Clinic.

For current users of the ePrescribe feature, you will switch over to the new interface on July 1st. At that time, you will be required to complete the [Identity Proofing Process](#) (~15 minutes) to be able to continue prescribing medications to your patients (even if you will not be prescribing controlled substances).

## 2. New - Faster Internal Chatting with Integrated Staff Web Chats

Internal staff communications just got faster and simpler with VSee Clinic provider-to-provider web chats. We've integrated internal staff chatting right into the VSee Clinic interface so you can now send internal chats without switching to your VSee Messenger app.

To learn more about how to send provider-to-provider web chats, please click [here](#).

## 3. New - Room Level Control of Clinic-wide Configurations

We're giving you more control over your room-level workflow configurations. Clinics with multiple rooms can now configure each room to have its own specific workflow. Current workflow configuration options include:

- Walk-In Visits
- Scheduled Appointments
  - Group Appointments
  - Allow Patient to Self Schedule
