

VSee Clinic 4.12.0 - New EPCS, Faster Internal Chatting, and More Room Configuration Control

2022-06-21 - Chi - VSee Clinic

Make your practice more productive with the newest features of the VSee Clinic 4.12.0 coming this June 21st.

- New - EPCS (Electronic Prescribing for Controlled Substances)
- New - Faster Internal Chatting with Integrated Staff Web Chats
- New - Room Level Control of Clinic-wide Configurations

1. New - EPCS (Electronic Prescribing for Controlled Substances)

We've improved your ePrescribing experience with new EPCS capabilities. Our new ePrescribe platform now allows you to prescribe controlled substances to your patients in addition to regular medications.

The screenshot displays the VSee Clinic ePrescribe interface for a patient named Houston Mills, Male, 31 yrs. The interface includes a header with a welcome message and a provider notification. Below the patient information, there are buttons for 'Add/Edit Drug Allergies' and 'Add/Edit Pharmacies'. A 'Coverage Details' box indicates 'No eligible coverages found.' A 'Drug/Allergy Interactions' box provides a warning: 'This patient is allergic to aspirin. Salicylic acid topical, which is a component of hydrocortisone/salicylic acid/sulfur topical is also topical salicylate and may show allergic cross-reactivity to aspirin.' The 'Add Prescription' section is active, showing 'Step 3' with fields for 'Current medication: Adderall (oral - tablet)', 'Schedule II', 'Current strength: 5 mg', and 'Effective Date'. A 'Patient Directions' field is also present. On the right, the 'Plan Selected For This Medication' section shows 'None Available' with a 'REFRESH' button and a 'Formulary Status' of 'Unknown'. Buttons for 'Add Prescription' and 'Add Patient Reported' are visible in the top right corner.

Note: Please contact [Sales](#) or your Account Manager to enable the ePrescribe feature in your Clinic.

For current users of the ePrescribe feature, you will switch over to the new interface on July 1st. At that time, you will be required to complete the [Identity Proofing Process](#) (~15 minutes) to be able to continue prescribing medications to your patients (even if you will not be prescribing controlled substances).

2. New - Faster Internal Chatting with Integrated Staff Web Chats

Internal staff communications just got faster and simpler with VSee Clinic provider-to-provider web chats. We've integrated internal staff chatting right into the VSee Clinic interface so you can now send internal chats without switching to your VSee Messenger app.

The screenshot displays the VSee Clinic internal chat interface. At the top, there is a navigation bar with the VSee Clinic logo and menu items: Dashboard, Patients, Schedule, and Health. On the right side of the navigation bar, there is a notification bell icon, a chat bubble icon, and a user profile for Dr. Mooney. Below the navigation bar, the main area is titled "Chats" and features a "New Chat" button. The chat interface is divided into two panes. The left pane shows a list of chat threads, each with a profile picture, name, and date. The threads include: MA Angela Baker (Jun 15), CSR Crystal Dunnovan (Jun 10), Dr. Ethan Faucett - Fresno (Jun 10), Dr. Georgia Howard - Anaheim (Jun 09), Dr. Irvine Jackson - Palm Springs (Jun 08), Dr. Kris Law - Long Beach (Jun 08), and Dr. John Smith (Jun 08). The right pane shows an active chat with CSR Crystal Dunnovan. The chat history includes: "All earlier messages loaded.", "Hi Dr. Mooney" (from CSR Crystal Dunnovan), "Hi Crystal." (from Dr. Mooney (You) at 2:06 PM), "Nancy O'brien asked if she can see you for a teleconsult today" (from CSR Crystal Dunnovan), "Yes. Will her husband join the session?" (from Dr. Mooney (You) at 2:06 PM), and "Peter can't make it today. What time should I set the appointment?" (from CSR Crystal Dunnovan). At the bottom of the right pane, there is a text input field labeled "Type your message here" and a "Send" button.

3. New - Room Level Control of Clinic-wide Configurations

We're giving you more control over your room-level workflow configurations. Clinics with multiple rooms can now configure each room to have its own specific workflow. Current workflow configuration options include:

- Walk-In Visits
- Scheduled Appointments
 - Group Appointments
 - Allow Patient to Self Schedule
