VSee Messenger 4.24 - Boost Collaboration with New @Mentions and Cross-App Media Sharing

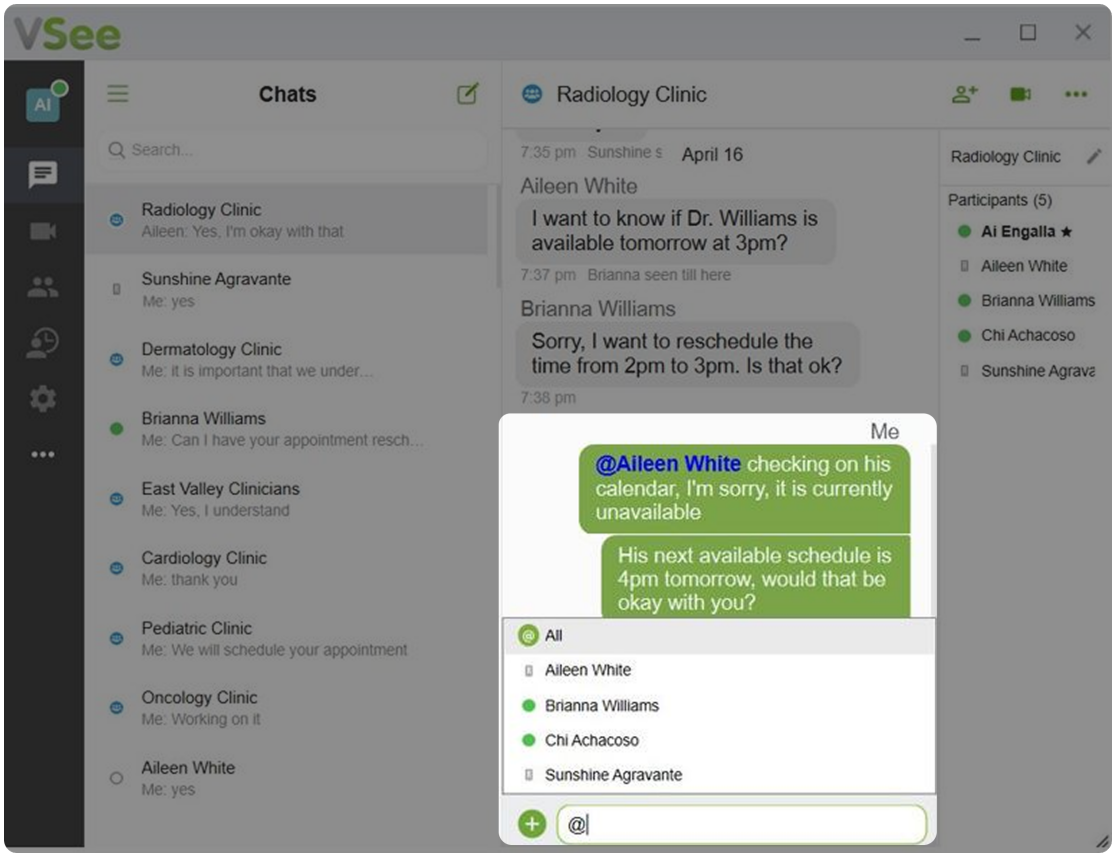

2025-04-28 - Jay-Ileen (Ai) - VSee Messenger

Keep an eye out for a series of new VSee Messenger modernization improvements in the coming months. On Apr. 28, we have the first of these updates in VSee Messenger 4.24, introducing two new features to make your collaboration experience smoother.

What's New?

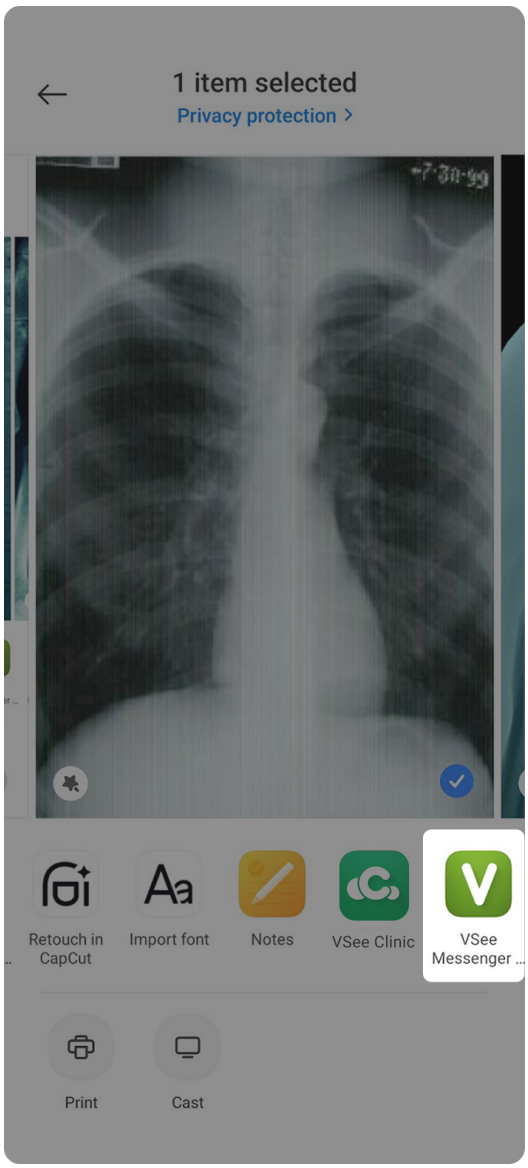

@Mentions in Group Chats

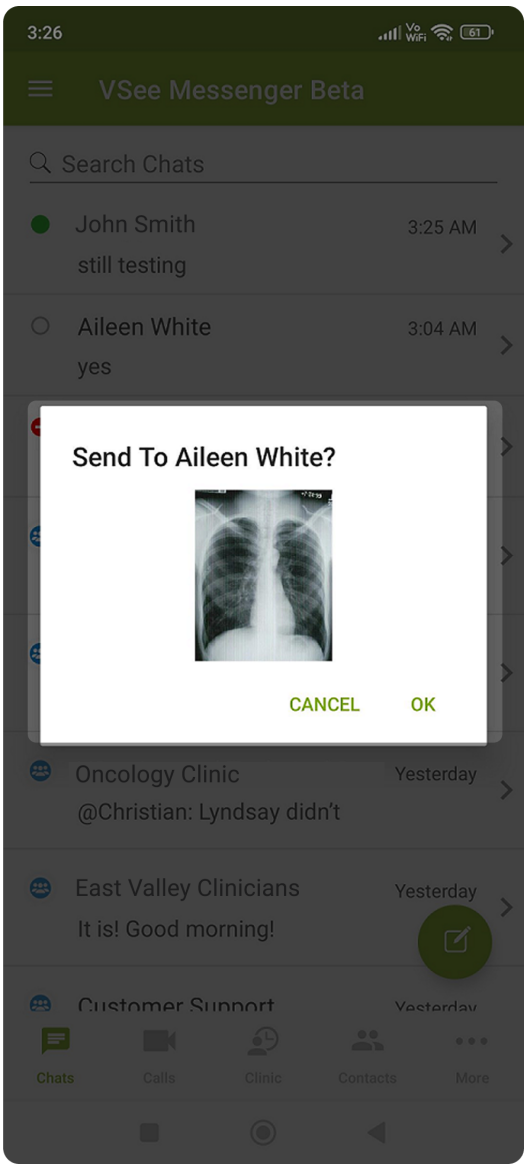

Group conversations just got a boost! With @Mentions, you can now call out specific teammates in any group chat. Whether you're highlighting an important update, asking for input, or simply making sure your message isn't overlooked, @Mentions help your team stay on the same page. Everyone stays engaged, and key messages reach the right people at the right time. Your message gets the attention it deserves.

Cross-App Media Sharing

Sharing content in VSee just got easier with our new external media sharing feature. It means you now have the ability to instantly send photos, files, links, and other media directly from your other apps into your VSee Messenger conversations. No need to copy and paste or switch between apps — just choose it and share it.

Make sure to upgrade to the latest version on the day of the release.
